Dear NYS Public Service Commission

This letter is to express our appreciation with your energy smart program. We were one of the first companies in our area to start taking advantage of this opportunity and it has been an integral part of our business. The co-op advertising that is available has allowed us to market ourselves aggressively and stay competitive. The POP materials have been a plus in keeping the sales floor attractive as well as informing customers about energy savings. Finally, the energy smart consultants have been an excellent source to go to for information or questions by ourselves or our customers. Thank you for all you do.

Sincerely, Tom Brauer
