Jaclyn A. Brillling
Secretary
New York State Public Service Commission
3 Empire State Plaza
Albany, NY 12223-1350

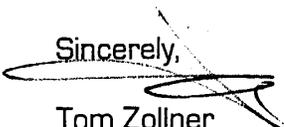

To Whom It May Concern:

As a candidate in the masters program at the Bard Center for Environmental Policy, I strongly urge you to continue the EMEP program funded by the System Benefits Charge.

It is essential for all citizens and residents of New York State to provide funding for the activities and programs developed by NYSERDA. These programs will help develop ways and systems to expand the market penetration of renewable energy programs with great potential in benefits for the economy and the environment alike.

Since the dangers in fossil fuel based energy are now widely recognized, NYSERDA is in my opinion a win-win program and deserves our commitment

Sincerely,

Tom Zollner
