Re: Case 05-M-0090 – In the Matter of the Systems Benefit Charge III, Staff Proposal

Dear Ms. Brillling:

As an owner and manager of affordable housing, I was gratified to learn that the PSC Staff has recommended an extension of the Systems Benefit Charge. NYSERDA's Assisted Multifamily Program (AMP) has provided technical and financial assistance to multifamily properties my company owns and manages, helping to maintain their affordability, reduce energy costs for residents, and improve health, comfort and safety.

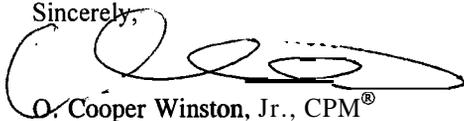

With respect to the specific recommendations in the Staff Proposal for the Extension of the Systems Benefit Charge (SBC), I would like to make the following suggestions:

- Costs of operating housing, from materials and equipment to wages and insurance, have increased significantly since authorization of SBC II. I believe that an increase in SBC III that keeps pace with other rising costs is warranted;
- The recent rise in energy prices places an enormous burden both on my facilities and on my tenants – most of my tenants have no capacity to pay additional rent to cover higher operating costs, rent adjustments from government will not be approved in sufficient time to offset those costs, and tenants will struggle to pay those energy costs that are billed directly to them. I urge that the PSC take additional steps to support low-income tenants through energy efficiency improvements and direct payment support.

Finally, I would like to reaffirm the importance of keeping the SBC finding free of the legislative appropriations process. NYSERDA has proven a judicious, impartial, effective administrator of SBC finds. A multi-year planning process is required to plan, modify and deploy programs tailored to transform energy markets over time. At a minimum, any legislative action must ensure sufficient predictability over multiple years for NYSERDA to carry out effective operations.

I commend the PSC on the conduct of an open, participatory process and on its continuing efforts to promote energy efficiency and ensure the viability of affordable housing.

Sincerely,

O. Cooper Winston, Jr., CPM®
Regional Vice President
