To: Jaclyn A. Brillig (New York State Public Commission)

I want to address some issues on state budget that will most definitely impact the New York State Energy Star Program. I think that NYSERDA should be awarded the SBC 3 funds and also funds between the (REAP) and the research & development(R&D) of NYSERDA should be separated. NYSERDA played a major role in getting New York involved in saving energy for the future and if the public commission take that benefit away from New York it will only hurt the market due to instability in the program. Energy Star program will not survive without NYSERDA. And I strongly recommend for creation of SBC charge for natural gas users in New York State to increase NYSERDA's funding for the New York Energy Smart programs. Awarding SBC 3 funds to NYSERDA is crucial to independent retailers so that NYSERDA could continue to deliver the services that help us with cooperative advertising , special promotions and participation in market transformation programs like Stay Cool. Please reconsider your decision in this important matter to have this program running smoothly.

Sincerely,  
Joe Kim
