Re: NYSERDA

Dear Ms. Brillling:

I am writing you to recommend that NYSERDA should be awarded the SBC 3 funds. As an electrical, lighting and heating supplier we understand the importance of these programs and feel our customers greatly benefit from the product research and information.

To ensure the life of these programs extending the SBC 3 funds after June 30, 2006 to at least seven years would be highly recommended.

We as a business greatly appreciate programs like REAP, ENERGY STAR products program and the various New York Energy Smart programs. Finding extra funding through a SBC charge for natural gas users in New York State would also help the programs stability.

In closing, we sincerely urge the funding for all these wonderful programs offered by NYSERDA, with are current energy issues it is very important to keep the public informed on using energy the smart way.

Thank you,

Matthew T. Hanlon
Vice President
