Albany, NY 12223-1350

I am writing regarding case # 05-M-0090, and would like to voice my support for SPC3. In anticipation of the increase in energy costs for the upcoming year, I would like to see an increase to 50% of the resources available for low income energy conservation, single family programs. This population will benefit greatest from energy conservation programs.

In addition, I would support a systems benefit charge attached to gas utilities as a way to increase these beneficial programs.

Thank you for past successes, and I am hoping we see reduced fuel consumption for our neediest residents in the future.

Sincerely;

Gary M. DeWitt
