Comments on Case 05-M-0090 SBC III

I am in support of the SBC III Residential Programs and would like to see it continue under a 10 year timeframe. As a local Community Action Agency we work with families in the are to help them make their homes more energy efficient, thus saving them money and saving energy for the overall economy. We work mostly with the residential customer and feel the funding for the residential side should be split at least 50/50 with the commercial side.

As a Community Action Agency most of our clients are low income and we see the need for the low income funding to be greatly increased.

A large portion of the families in our community use natural gas and a program to help them become more energy efficient is greatly needed.

Thank you for your attention in this matter.

Sincerely,
Barbara Hahn
Program Director
