Dear Ms. Brillling:

This letter is in reference to case #50-M-0090. I feel that it is very important that funding for NYSERDAS residential energy conservation services should not be cut they need to be increased. These programs benefit many low income customers. I would like to see the time frame be extended beyond the five years perhaps to ten years to allow the programs to mature. Increase the funding for the residential portion possible a fifty-fifty split between residential and commercial customers. Increase the funding for low income programs to fifteen percent. Include a program for residential natural gas customers. Increase the funding above the one hundred fifty million dollar level. These programs are currently benefiting many needy customers and by increasing funding we can help many more.

Thank you,

Don Power
