Albany, N. Y. 12223-1350

Att: Jaclyn A. Brillling
Secretary . N.Y.S. Public Service Commission

Dear Jaclyn:

With all the rising costs , both businesses and consumers are faced with , we feel that the programs connected with NYSEDA have helped us to sell energy star products . We also feel nyserda should be awarded the SBC3 funds, and that the sbc3 funds should be extended beyond June 30th 2006, for at least an additional five to seven years, to ensure program stability of their field reps & programs.

Programs like enegy star & energy smart, help us to offset adv costs & promotes products that will also save consumers dollars over the life of these products. With rising energy costs , we desperatly need these programs to continue. Also please continue to allocate funds to the Residential And Energy Affordabilty Program (REAP) . Please promote reaserch & development of nyserda . We would also like to see the creation of SBC charges for natural gas users in New York State to increase funding fo nyserda & energy smart programs.

All these programs help small businesses like ours to promote sales of energy star products & help consumers to conserve energy.

Thank You ! in advance for your prompt attention in these matters.
