Reference: System Benefits Charge (SBC) III

Ms. Jaclyn A. Brillling
Secretary, New York State PSC

Dear Ms. Brillling:

As a manufacturing partner, I am writing this letter to let you know that we are committed to support New York Energy Star \$martSM programs and the associated issues. We understand that the New York Energy Star programs have benefited not only the rate-payers of electricity companies across the state, but also the manufacturers participating in these programs. Because the programs enable customers to reduce their electricity use, we understand that an annual energy savings of around \$200M has been achieved. We have also been informed recently that, the programs help contribute to your state's standing as the most energy-efficient on a per-capita basis in the nation. We are proud of being part of your team this year.

At the personal level, I would like to let you know that the Energy Star program staffs are just wonderful to work with. They are all professional, and deserve my best compliments.

I strongly recommend that you help ensure these energy-saving, energy-efficiency programs can continue. In specific,

- NYSERDA should be awarded the SBC 3 funds.
- Extend SBC 3 funds for five to seven years, after June 30, 2006, to ensure program stability.
- Separate funds between the REAP program and the R&D of NYSERDA. Subsequently, allow significant funds to be designated to REAP for programs like the Energy Star product programs and other New York Energy \$mart programs.
- Push for a creation of SBC charge for natural gas users in New York State to increase NYSERDA's funding for the New York Energy \$mart programs.

Your support is critically important. After all, the programs' continued success helps customers, economy, the state and the nation.

Sincerely,

C. Johnny Shih
