

BEFORE THE
STATE OF NEW YORK
PUBLIC SERVICE COMMISSION

In the Matter of

National Grid PLC and KeySpan Corporation - Proposed Merger

Case 06-M-0878

The Brooklyn Union Gas Company d/b/a KeySpan Energy Delivery
New York - Gas Rates

Case 06-G-1185

KeySpan Gas East Corporation d/b/a KeySpan Energy Delivery
Long Island - Gas Rates

Case 06-G-1186

January 2007

Prepared Testimony of:

Stephen A. Berger
Utility Consumer Program
Specialist 4

State of New York
Department of Public Service
Three Empire State Plaza
Albany, New York 12223-1350

1 Q. Please state your name and business address.

2 A. My name is Stephen Berger and my business
3 address is Three Empire State Plaza, Albany, New
4 York 12223.

5 Q. Mr. Berger, what is your position at the
6 Department?

7 A. I am employed as a Utility Consumer Program
8 Specialist 4 in the Department of Public
9 Service.

10 Q. Please describe your educational background and
11 professional experience.

12 A. I received a Bachelor of Science degree from the
13 Rensselaer Polytechnic Institute in Troy, New
14 York (RPI) in 1975 and a Master of Science
15 degree from RPI in 1987. I am a member of the
16 national mathematics honor society, Pi Mu
17 Epsilon. From 1979 until 2001, I was employed
18 by the New York State Consumer Protection Board
19 in various positions, ultimately as Associate
20 Utility Rates Analyst. From 2001 through the
21 present, I have been employed by the Department.

22 Q. Please briefly describe your current

1 responsibilities with the Department and
2 previous responsibilities with the Consumer
3 Protection Board.

4 A. I am currently responsible for analyzing
5 competitive market policy issues: including
6 Energy Service Company (ESCO) referral programs
7 (ERPs), competitive metering, rate unbundling,
8 unbundled utility bills, and implementation of
9 changes to the Home Energy Fair Practices Act
10 (HEFPA). In my previous position with the
11 Consumer Protection Board, I was responsible for
12 analyzing issues related to competitive energy
13 and telecommunications policy, cost recovery,
14 sales forecasts, revenue allocation, rate
15 design, and consumer protections.

16 Q. Have you previously testified before the
17 Commission or other regulatory agencies?

18 A. I have submitted testimony in over 50 energy
19 related proceedings before the Commission on
20 numerous topics including, revenue allocation,
21 rate design, standby rates, unbundling and other
22 issues related to retail competition. I also

1 served as co-chair of one of the four main
2 committees in the 00-M-0504 Competitive Markets
3 Case, a case focused on the evaluation of the
4 retail markets in New York State, and
5 participated in and contributed to the other
6 three committees.

7 Q. Have you submitted other testimony in this
8 proceeding?

9 A. Yes. I have also filed testimony on rate
10 unbundling with the Staff Unbundling Panel.

11 Q. In your testimony, will you refer to, or
12 otherwise rely upon, any information produced
13 during the discovery phase of this proceeding?

14 A. Yes. I will refer to, and have relied upon,
15 several responses to Staff Information Requests.
16 They are attached as Exhibit __ (SAB-1).

17 Q. KEDNY and KEDLI have proposed a merger with
18 National Grid and have sponsored a ten-year rate
19 plan proposal. Will your testimony address
20 these proposals?

21 A. No. My testimony will be independent of the
22 Companies' requests for merger and extended rate

1 plan consideration. While some of the
2 underlying information technologies discussed in
3 my testimony may depend on the result of the
4 merger, the issues I will discuss can be severed
5 from the computer hardware issues raised by
6 KEDNY and KEDLI that are linked to its merger
7 proposal.

8 Q. What is the purpose of your testimony?

9 A. The purpose of my testimony is to address the
10 Companies' proposals for unbundling the
11 Companies' bills to reflect the charges
12 unbundled in their embedded cost of service
13 (ECOS) study to assist customers in
14 distinguishing between commodity and delivery
15 service costs. I will also address suspension
16 of service issues.

17 Unbundled Bill Format Issues

18 Q. Have you addressed unbundled bill format issues
19 elsewhere in this proceeding?

20 A. Yes. I am a member of the Staff Unbundling
21 Panel and addressed the division of costs on
22 customers' bills in that context.

1 Q. What other Unbundled Bill Format issues exist in
2 the Companies' proposals?

3 A. As is common throughout many of the Companies'
4 proposals, KEDLI and KEDNY have proposed to
5 delay unbundling their bills until after
6 decisions have been made regarding upgrading
7 and/or integrating the Companies' computer
8 systems or information technology (IT).
9 According to Witness Lukas, both KEDNY and KEDLI
10 propose to wait until the merger issues are
11 determined before making computer hardware and
12 software decisions, after which they will
13 determine how and when they will unbundle the
14 Companies' bills.

15 Q. Is this proposal reasonable?

16 A. No. Mr. Lukas confuses Unbundled Bill Format
17 design with implementation and would place a
18 restriction on the former that is solely related
19 to the latter. Following this proposal could
20 lead to cost increases which the Companies might
21 seek to recover from ratepayers.

22 Q. Please explain.

1 A. In Response to IR Requests DPS-143-6 and DPS-
2 149-6, Mr. Lukas seemed to be willing to
3 separate those issues unrelated to IT from the
4 implementation timetables that would rationally
5 depend on the systems available. However, in
6 response to follow-up IR Requests DPS 248-2 and
7 DPS 252-2, Mr. Lukas still indicates that a
8 mock-up bill can not be presented without
9 "resolution of the review of the existing
10 billing system by the IT Integration Team." It
11 is unclear when these mock-ups will be prepared
12 for review, but as of this date they have not
13 been so.

14 Further, other portions of compliance with the
15 Commission's February 18, 2005 Unbundled Bill
16 Format Order have nothing to do with IT
17 whatsoever, yet KEDLI and KEDNY have failed to
18 address these in their filing and been
19 unresponsive in their responses to IR Requests.
20 These include consumer education and outreach
21 plans regarding bill format changes and draft

1 tariff amendments to conform current tariffs to
2 the revised bill formats.

3 Q. Why is that a problem?

4 A. Essentially, KEDLI and KEDNY seek to hold back
5 on compliance with a Commission Order until
6 their proposal for merger is addressed. This is
7 both unnecessary and potentially costly for
8 customers. When bill formats are changed as
9 they would be if rates were unbundled on bills,
10 the format needs to be designed to meet the
11 objectives (in this case to reveal separately
12 the utility price commodity and delivery service
13 costs) and then the implementation is scheduled
14 to meet the needed hardware/software changes
15 that may be required. When properly conducted,
16 changes in bill format should start with a mock-
17 up of the proposed changes, a plan to educate
18 customers, and a review of the tariffs to
19 ascertain the necessary changes, if any, to
20 implement the new bill format.
21 When those stages are complete, then the utility
22 would begin the implantation process.

1 Q. Don't existing computer systems dictate the way
2 a utility will make format changes?

3 A. No, IT directs bill formats only to a limited
4 extent. Further, in KEDLI's situation, the
5 Company had already decided to replace its
6 existing system, but has delayed that process
7 while its proposed merger is considered by the
8 Commission. Therefore, for it, there is no
9 "existing" system with which to assure
10 consistency. Generally, once a bill format has
11 been determined as it has in this case, there
12 are only minor changes that would be made to
13 accommodate the IT available to the Company.
14 The Companies might not be able to perfectly
15 produce the final bill format in this instance,
16 but they certainly could address many of the
17 issues in unbundling their bills with the
18 understanding that additional work may follow.
19 The most crucial issue in unbundling the bill
20 format is how the costs are divided and what
21 information is provided to customers, not

1 exactly where on the paper items will ultimately
2 reside.

3 Further, plans for educating customers about
4 impending changes to their bills can be made
5 without having implemented the bill. Similarly,
6 determinations can be made regarding what tariff
7 amendments may be required without IT decisions
8 or bills being implemented.

9 Q. How could this cost customers more?

10 A. The Companies must comply with the Unbundled
11 Bill Order and seem willing to do so. They must
12 assure that when they set up their new IT
13 systems, they do so with a planned unbundled
14 bill format in mind from the start. If they
15 wait until after the merger and IT issues are
16 settled before starting to think about the bill
17 format and tariff changes, they run the risk of
18 having to add the new bill format on as an
19 incremental project, rather than as part of the
20 initial installation. That could raise the cost
21 of implementation unnecessarily.

22 Q. What do you propose?

1 A. The Companies are already out of compliance with
2 the Unbundled Bill Format Order, by not filing
3 proposed bill formats, customer education and
4 outreach plans, and proposed tariff changes.
5 They claim that IT decisions must be reached
6 first and that those decisions rely upon the
7 result of their merger petition. KEDLI and
8 KEDNY should file unbundled bill drafts during
9 this proceeding and discuss with Staff the
10 proposed changes and how they meet the
11 requirements of the Unbundled Bill Format Order.
12 They should also file customer education and
13 outreach plans and any proposed tariff changes
14 concurrently with those drafts. If this is done
15 within the context of these proceedings, then
16 implementation can be addressed when the IT
17 decisions are made, with or without a merger
18 with National Grid. If it is not done and KEDLI
19 and KEDNY decide that they will wait until this
20 case is decided to begin the process and then
21 file draft unbundled bill formats and
22 implementing tariffs at a later date, the

1 Commission should deny any additional IT costs
2 requested for implementation based on the
3 assumption that had the Companies complied with
4 the Unbundled Bill Format Order, they could have
5 avoided incremental IT costs associated with it.

6 Suspension-Related Issues

7 Q. How are the Companies implementing ESCO
8 requested suspensions of residential service
9 under the Home Energy Fair Practices Act
10 (HEFPA)?

11 A. According to the Companies, they have a manual
12 process designed to handle ESCO suspension
13 requests. However, as of this date no such
14 requests have been made by ESCOs.

15 Q. Is this a problem?

16 A. Yes. Part of HEFPA requires additional efforts
17 of ESCOs who choose to serve residential
18 customers. To balance the extra requirements,
19 ESCOs have the ability to request suspension of
20 a customer's delivery service if their portion
21 of the bill is unpaid. This, in turn, is
22 balanced by the fees charged by the utility for

1 implementing the suspension and for calculating
2 the "lesser of" reconnection number required on
3 the ESCO suspension notice to the customer. The
4 additional onus of using a manual system to
5 process suspensions makes the process much more
6 difficult and costly to the ESCO, depriving it
7 of its legal rights.

8 Q. How is this related to POR and the Companies' IT
9 implementation?

10 A. A POR program eliminates the need for
11 suspensions and related fees and
12 implementations, because the debt owed to the
13 ESCO is transferred to the utility before any
14 arrearage can accumulate that would trigger a
15 suspension. KEDLI and KEDNY have delayed
16 implementing an automated suspension process
17 through EDI or other means while waiting to
18 implement a POR program. Therefore, ESCOs have
19 been waiting for the Companies to implement some
20 plan, either a suspension process that is
21 automated or a POR program, in order to be
22 availed of their HEFPA rights.

1 Q. What do you propose?

2 A. The Companies should implement an automated
3 suspension process through EDI, or another means
4 should that prove both more expedient and
5 acceptable to the ESCOs serving residential
6 customers on KEDLI's and KEDNY's systems, within
7 those time limits.

8 Q. Does this conclude your testimony at this time?

9 A. Yes.
