

BEFORE THE
STATE OF NEW YORK
PUBLIC SERVICE COMMISSION

In the Matter of

Consolidated Edison Company of New York, Inc.

Case 07-E-0523

September 2007

Prepared Testimony of:
Accounting Panel

Kristee Adkins
Public Utilities Auditor 2

Claude Daniel
Public Utilities Auditor 2

Sean Malpezzi
Senior Auditor

Thomas J. Rienzo
Public Utilities Auditor 3

John Scherer
Supervisor

Jane Wang
Public Utilities Auditor 2

Office of Accounting, Finance
and Economics
State of New York
Department of Public Service
Three Empire State Plaza
Albany, New York 12223-1350

1 Q. Please state your names, employer, and business
2 addresses.

3 A. We are Kristee Adkins, Claude Daniel, Sean
4 Malpezzi, Thomas Rienzo, John Scherer, and Jane
5 Wang. We are employed by the New York State
6 Department of Public Service (Department). Our
7 business addresses are Three Empire State Plaza,
8 Albany, New York 12223 and 90 Church Street, New
9 York, New York 10007.

10 Q. Ms. Adkins, what is your position at the
11 Department?

12 A. I am employed as a Public Utilities Auditor 2 in
13 the Office of Accounting, Finance and Economics.

14 Q. Please describe your educational background and
15 professional experience.

16 A. I graduated from the State University of New
17 York Institute of Technology in Marcy, New York
18 in 2002 with a Bachelor of Science degree in
19 Accounting and Finance. I have been employed by
20 the Department since June 2005. In the course
21 of my employment, I examine accounts, records,
22 documentation, policies and procedures of
23 regulated utilities. I have participated in the
24 rate proceedings in Case 06-G-1332, Con Edison -

1 Gas Rates, Case 05-W-0802, Adrian's Acres West
2 Water Company, Inc., and in Case 05-G-1494,
3 Orange and Rockland Utilities, Inc. (Orange and
4 Rockland). I have also worked on asset transfer
5 filings for Consolidated Edison Company of New
6 York, Inc. (Con Edison) in Cases 06-M-0407, 99-
7 E-1146, and 07-E-0106 and for Adrian's Acres
8 West Water Company, Inc in Case 06-W-1187.

9 Q. Ms. Adkins, have you previously testified before
10 the New York State Public Service Commission
11 (the Commission)?

12 A. Yes, I have submitted testimony on various other
13 operating revenues such as late payment charges
14 (LPC) and operation and maintenance (O&M)
15 expense forecasts in Case 05-G-1494, Orange and
16 Rockland - Gas Rates and in Case 06-G-1332, Con
17 Edison - Gas Rates.

18 Q. Mr. Daniel, what is your position at the
19 Department?

20 A. I am employed as a Public Utilities Auditor 2 in
21 the Office of Accounting, Finance and Economics.

22 Q. Please describe your educational background and
23 professional experience.

24 A. I graduated from Hunter College of the City

1 University of New York with a Bachelor degree in
2 Accounting and joined the Department in 1986.

3 Q. Please describe your responsibilities with the
4 Department.

5 A. I routinely examine accounts, records,
6 documentation, policies, and procedures of
7 regulated utilities. I have also reviewed
8 numerous petitions filed by Con Edison seeking
9 authority for asset transfers, deferrals and
10 reconciliations.

11 Q. Mr. Daniel, have you previously testified before
12 the Commission?

13 A. Yes, I have prepared cost of service exhibits
14 and offered testimony on various O&M expense,
15 other taxes and rate base adjustments in
16 previous Con Edison Electric, Gas and Steam Rate
17 Cases including Cases 04-E-0572, 06-G-1332, 05-
18 S-1576. I also testified on rate base items in
19 Case 90-C-0191, New York Telephone Company -
20 Rates.

21 Q. Mr. Malpezzi, what is your position at the
22 Department?

23 A. I am employed as a Senior Auditor in the Office
24 of Accounting, Finance and Economics.

1 Q. Please describe your educational background and
2 professional experience.

3 A. I graduated from Siena College, Loudonville, New
4 York in 2001 and have a Bachelors of Business
5 Administration (B.B.A.) degree with an
6 Accounting Major. I have been employed by the
7 Department since September of 2005. Previously,
8 I was employed as an Auditor for the NYS Credit
9 Union League.

10 Q. Please briefly describe your responsibilities
11 with the Department and professional experience.

12 A. I have general responsibility for accounting and
13 ratemaking matters related to New York's
14 municipal electric utilities. My direct
15 responsibilities include examination of
16 accounts, records, documentation, policies and
17 procedures of regulated utilities. I have been
18 involved in several electric rate cases
19 including: Case 05-E-1496, Plattsburgh; Case 05-
20 E-1247, Castile; Case 06-E-0334, Churchville;
21 Case 06-E-0911, Village of Freeport. I have
22 prepared various analyses directly related to
23 revenue requirement.

24 Q. Mr. Malpezzi, have you previously testified

1 before the Commission?

2 A. Yes. I submitted testimony before the
3 Commission on Labor Expense and various O&M
4 expense adjustments in a Village of Freeport
5 Electric Department rate filing, Case 06-E-0911.

6 Q. Mr. Rienzo, what is your position at the
7 Department?

8 A. I am employed as a Public Utilities Auditor 3 in
9 the Office of Accounting, Finance and Economics.

10 Q. Please describe your educational background and
11 professional experience.

12 A. I graduated from Siena College, Loudonville, New
13 York in 1986 with a B.B.A., majoring in
14 Accounting. I have been employed by the
15 Department since 1990. Prior to joining the
16 Department, I was the Manager, State and Local
17 Tax for Cluett, Peabody & Co., Inc., in Troy,
18 New York.

19 Q. Please briefly describe your responsibilities
20 with the Department.

21 A. My direct responsibilities as a Public Utilities
22 Auditor include examination of accounts,
23 records, documentation, policies and procedures
24 of regulated utilities. For the last five

1 years, I have served as the "Account Executive"
2 for municipal issues within the Office of
3 Accounting, Finance and Economics. The "Account
4 Executive" is the initial point of contact for
5 both Department Staff and the utilities relating
6 to a specific issue or industry. I have been
7 involved in numerous rate and accounting
8 examinations, including most of the recent
9 municipal rate proceedings, specifically: Case
10 06-E-0911, Village of Freeport; Case 06-E-1247,
11 Churchville; Case 05-E-1247, Castile; Case 05-E-
12 1496, Plattsburgh Municipal Lighting Department;
13 and Case 04-E-1485, City of Jamestown Board of
14 Public Utilities. In each of these proceedings,
15 I have prepared various analyses directly
16 related to revenue requirement.

17 Q. Mr. Rienzo, have you previously testified before
18 the Commission?

19 A. Yes. I have testified before the Commission on
20 revenue requirement and rate of return. I
21 submitted revenue requirement and rate of return
22 testimony on a Village of Freeport Electric
23 Department rate filing in Cases 95-E-0676 and
24 06-E-0911, Village of Freeport.

1 Q. Mr. Scherer, what is your position at the
2 Department?

3 A. I am employed as a Supervisor in the Office of
4 Accounting, Finance and Economics.

5 Q. Please describe your educational background and
6 professional experience.

7 A. I graduated from Siena College, Loudonville, New
8 York in 1988 and have a B.B.A. degree with an
9 Accounting major. I have been employed by the
10 Department since 1988.

11 Q. Please briefly describe your responsibilities
12 with the Department.

13 A. My responsibilities include examination of
14 accounts, records, documentation, policies and
15 procedures of regulated utilities. I have been
16 involved in numerous rate and accounting
17 examinations including Con Edison's last three
18 electric rate proceedings, the Company's
19 electric and gas rate unbundling proceeding and
20 the Company's last two gas and steam rate cases.
21 I have general responsibility for accounting and
22 ratemaking matters related to Con Edison and its
23 affiliate Orange and Rockland Utilities.

24 Q. Mr. Scherer, have you previously testified

1 before the Commission?

2 A. Yes, I have testified in numerous Commission
3 proceedings on a variety of accounting and
4 regulatory issues including property taxes,
5 pensions and other post employment benefit
6 (OPEBs), EBCAP adjustments, O&M expense
7 forecasts, federal income taxes, various rate
8 base components, and tax refunds. With specific
9 reference to Con Edison, I submitted testimony
10 in the Company's prior electric, gas, and steam
11 rate cases, the Unbundling Track of the
12 Competitive Markets Proceeding (Case 00-M-0504)
13 and in two income tax proceedings.

14 Q. Ms. Wang, what is your position at the
15 Department?

16 A. I am employed as a Public Utilities Auditor 2 in
17 the Office of Accounting, Finance and Economics.

18 Q. Please describe your educational background and
19 professional experience.

20 A. I graduated from Tsinghua University, Beijing,
21 China in 1985 with a BS degree in Electric Power
22 Engineering. I also received a Master's degree
23 in Electric Power Engineering from Tsinghua
24 University in 1988. I received a Master's in

1 Business Administration from Union College,
2 Schenectady, New York in 1997. I have
3 experience working as a cost engineer with
4 General Electric and a Staff Accountant with
5 Time Warner Cable. I have been employed by the
6 Department since April 2005. I have worked on
7 municipal rate proceedings and general
8 accounting examinations.

9 Q. Please briefly describe your responsibilities
10 with the Department.

11 A. My responsibilities include examination of
12 accounts, records, documentation, policies and
13 procedures of regulated utilities. I have
14 worked on Case 05-E-0553, Village of Bath, Con
15 Edison's petition for accounting change
16 regarding its lease agreement with the City of
17 New York for transformer vaults in Case 06-E-
18 1101, and currently Con Edison's petition
19 regarding the asset retirement obligation in
20 Case 05-M-1624. In Case 05-S-1376, Consolidated
21 Edison Company of New York, Inc. - Steam Rates,
22 and Case 06-G-1332, Consolidated Edison Company
23 of New York, Inc. - Gas Rates, I worked on
24 revenue requirement models and accounting

1 examinations.

2 Q. Ms. Wang, have you previously testified before
3 the Commission?

4 A. Yes, I have submitted testimony in Con Edison
5 last steam and gas rate proceedings in Case 05-
6 S-1376, Consolidated Edison Company of New York,
7 Inc. - Steam Rates and Case 06-G-1332,
8 Consolidated Edison Company of New York, Inc. -
9 Gas Rates.

10 Q. Panel, what is the purpose of your testimony?

11 A. Our testimony addresses accounting aspects of
12 Con Edison's electric rate filing. We will
13 discuss and recommend adjustments in the
14 following areas:

- 15 - Late Payment Charge Revenues
- 16 - Fuel management Program
- 17 - ADR Deferred Tax Benefits
- 18 - Direct Current Incentive Program
- 19 - World Trade Center Costs
- 20 - Company Labor
- 21 - Duplicate Miscellaneous Charges
- 22 - Pension and OPEB Expense
- 23 - Employee Welfare Expense
- 24 - ERRP Major Maintenance

- 1 - Informational Advertising Expense
- 2 - Insurance Expense
- 3 - Interference Expense
- 4 - Site Investigation and Remediation
- 5 - Postage
- 6 - Rents - ERRP Carrying Charge
- 7 - Shared Services
- 8 - Uncollectible Expense
- 9 - Water Expense
- 10 - Other Operation and Maintenance Expense
- 11 - Inflation
- 12 - Property Tax Expense
- 13 - Reconciliation and Deferred Accounting -
- 14 Property Taxes
- 15 - Earnings Base Capitalization Adjustment
- 16 - Prepaid Pension - EBC
- 17 - Business Incentive Rate Discounts Expense
- 18 - Excess Deferred State Income Taxes
- 19 - Long Island City Outage Costs
- 20 - Deferred Income Taxes-Section 263A
- 21 - Federal Income Taxes
- 22 - First Avenue Proceeds
- 23 - Deferred Accounting Requests
- 24 We also summarize Staff's overall revenue

1 requirement position.

2 Q. What is the effect of Staff's adjustments on
3 rate of return?

4 A. The adjustments, as shown on Exhibit____(AP-2),
5 Schedule 1, increase the electric rate of return
6 before any proposed rates from 3.30% to 4.42%.

7 Q. What is the rate of return recommended by the
8 Financial Panel?

9 A. The Financial Panel recommends a 7.25% rate of
10 return based on an 8.9% return on equity. As a
11 result, the indicated rate change in electric
12 rates is a \$618 million increase for the rate
13 year ending March 31, 2009.

14 Q. What are the major areas where Staff is
15 proposing adjustments?

16 A. The adjustments fall into eight major
17 categories: sales, other operating revenues,
18 Operation and Maintenance (O&M) expenses,
19 depreciation, property taxes, rate base, income
20 taxes, and working capital.

21 Q. Please highlight the amount of the adjustments
22 for each of categories.

23 A. Witness Liu has proposed \$18.4 million of
24 additional sales revenues which are offset by

1 the Consumer Service Panel's recommendation to
2 increase the low income program by \$12.4
3 million.

4 This Panel proposes \$65.2 million of
5 adjustments to the Company's other operating
6 revenues. Of this amount, \$23.2 million
7 reflects our proposal to reduce the Company's
8 requested level of World Trade Center costs
9 recoveries, \$20.7 million is related to Staff's
10 proposal to pass back excess deferred state
11 income taxes to customers and \$17.6 million is
12 related to our proposed pass back to customer
13 prior cost over-recoveries.

14 Staff is proposing \$103.4 million of
15 adjustments to O&M expenses. The major
16 adjustments are to Site investigation and
17 remediation costs, Company Labor, Interference,
18 Informational Advertising, Stock Options and
19 Employee welfare expenses.

20 Various Staff witnesses have proposed
21 adjustments to rate year depreciation expense
22 totaling \$33 million. These adjustments related
23 to the proposed elimination of certain capital
24 projects, changes to the Company's proposed

1 depreciation rates and the treatment of the
2 reserve deficiency.

3 This Panel is proposing adjustments of \$2.8
4 million to the Company's taxes other than income
5 taxes.

6 Staff is proposing to decrease the
7 Company's proposed rate year rate base by \$574
8 million. This is primarily driven by
9 adjustments to the Company's treatment of its
10 prepaid pension expense, reductions to the
11 Company's capital construction forecast,
12 corrections of Company errors in the EBC
13 calculation, and the elimination of deferred
14 World Trade Center costs.

15 Staff's adjustments have impacts on the
16 income taxes, primarily due to lower income
17 resulting from our recommended return on equity.
18 Staff's adjustments also affect the Company's
19 working capital needs. Finally, as noted above
20 the Finance Panel recommends a lower rate of
21 return than the Company's request.

22 Q. Will the Panel refer to, or otherwise rely upon,
23 any information produced during the discovery
24 phase of this proceeding in its testimony?

- 1 A. Yes, the Panel will refer to, and has relied
2 upon, several responses to Staff Information
3 Requests (IR) and Company supplied workpapers.
4 They are designated as Exhibit___(AP-1).
- 5 Q. Is the Panel sponsoring any other Exhibits?
- 6 A. Yes, as previously mentioned, the Panel is
7 sponsoring Exhibit___(AP-2), which is Staff's
8 cost of service presentation. In addition, we
9 have Exhibit___(AP-3), which we will describe in
10 detail later.
- 11 Q. Please describe Exhibit __ (AP-2).
- 12 A. Exhibit___(AP-2) contains eight schedules.
13 Schedule 1 is Staff's projection of electric
14 operating income, rate base and rate of return
15 for the 12 months ending March 31, 2009, and
16 includes Staff's proposed revenue requirement.
17 Schedule 1 is supported by Schedules 2 through
18 8.
- 19 Q. Please describe the format of Schedule 1.
- 20 A. Column 1 of Schedule 1 contains the income
21 statement, rate base and rate of return figures
22 as filed by the Company for the rate year,
23 before a revenue increase. Column 2 contains
24 the Company's preliminary updates as of August

1 7, 2007. Column 3 reflects the income
2 statement, rate base and rate of return figures
3 as updated by the Company. Column 4 contains
4 references to the supporting schedules that
5 present Staff's adjustments set forth in Column
6 5. Column 6 presents Staff's projected rate
7 year figures before a revenue increase. Column
8 7 contains Staff's proposed changes in revenues,
9 and Column 8 is Staff's projected rate year
10 income, rate base and rate of return after this
11 revenue increase.

12 Q. What information is shown on Schedules 2 and 3?

13 A. Schedule 2 projects O&M expense cost elements
14 for the rate year. Schedule 3 projects taxes
15 other than income taxes.

16 Q. What information is shown on the remaining
17 schedules?

18 A. Schedules 4 and 5 project New York State and
19 federal income tax expenses, respectively. The
20 adjustments in these schedules correspond
21 primarily to adjustments set forth in other
22 schedules. Schedule 6 projects the rate base
23 for the rate year ending March 31, 2009.
24 Schedule 7 projects an allowance for working

1 capital, which is a component of rate base.
2 Schedule 8 lists Staff's adjustments with their
3 supporting witnesses.

4 **Proposed Three-Year Rate Plan**

5 Q. Con Edison sponsored a three-year rate proposal
6 in its filing. Will the Panel address this
7 proposal?

8 A. No. Witness Rasmussen states in his pre-filed
9 testimony at page 11, lines 9 through 16 that,
10 while Con Edison proposes a three-year rate
11 plan, the Company does not waive its rights to
12 file for new rates immediately after the
13 conclusion of this case should it determine that
14 the rates set by the Commission in its rate
15 order for the first rate year are inadequate or
16 if the Company determines that the terms set by
17 the Commission for the other two rate years are
18 unreasonable. Given the Company's position, our
19 testimony will only address the issues necessary
20 for the Commission to determine rates for a
21 single rate year, or until the Company files its
22 next rate case and the Commission makes a
23 determination on that request.

24

1 **Other Operating Revenues**

2 **Late Payment Charge (LPC) Revenues**

3 Q. Please explain the Company's methodology used to
4 forecast late payment charge (LPC) revenues.

5 A. The Company's Accounting Panel forecasted LPC
6 revenues at \$21.329 million for the rate year
7 using a historic three-year average of LPC
8 revenues. In the response to Staff IR DPS-178,
9 the Company stated that a three-year average
10 ratio of LPC revenues to sales applied to the
11 rate year sales revenues produced a similar
12 amount of LPC revenues for the rate year as the
13 historic three-year average of LPC revenues.

14 Q. Does the Panel agree with this statement?

15 A. No, the Panel does not. LPC revenues will be
16 understated using a historic three-average of
17 LPC revenues alone.

18 Q. Please explain.

19 A. LPC revenues have a relationship to sales
20 revenues. We agree with the forecast
21 methodology described by the Company's
22 Accounting Panel in the response to Staff IR
23 DPS-178. The Company's Accounting Panel stated
24 that the LPC revenue forecast was based on the

1 relationship between LPC revenues to sales
2 revenues. The calculation starts with the LPC
3 revenues expressed as a percentage of actual
4 sales revenues to develop a ratio for each of
5 the three previous years. These three ratios
6 are then averaged, and the average ratio is
7 applied to the forecast of customer sales
8 revenues to determine the LPC revenues forecast.

9 Using data provided in the response to
10 Staff IR DPS-179, we developed a three-year
11 average of LPC ratios of .2704% for non-
12 residential and .4417% for residential. We
13 applied the ratios to Staff's forecast of sales
14 revenues which results in our LPC revenue
15 forecasts of \$9.635 million for non-residential
16 and \$12.402 million for residential. Therefore,
17 our forecasted total rate year LPC revenues are
18 \$22.037 million; this results in an adjustment
19 to LPC revenues of \$708,000.

20 **Fuel Management Program**

21 Q. Please explain the Company's forecast of Fuel
22 Management Program revenues.

23 A. The Company's Accounting Panel forecasted Fuel
24 Management Program revenues using only the

1 historic year (12 months ending December 31,
2 2006) level of \$98,721.

3 Q. Does the Panel agree with this forecast method?

4 A. No, the Panel does not. Fuel Management Program
5 revenues will be understated by using just the
6 historic year ending December 31, 2006.

7 Q. Please explain.

8 A. The Company's records show that the Fuel
9 Management Program revenues for the 12 months
10 ending December 31, 2004, 2005 and 2006 were
11 \$69,346, \$245,017 and \$98,721, respectively.
12 Using a historic three-year average to forecast
13 the rate year level will mitigate anomalies and
14 fluctuations evident in any single year. In the
15 response to Staff IR DPS-300, the Company
16 acknowledged that the 2004 and 2005 results
17 could conceivably recur in the rate year. The
18 Company also indicated that it would not object
19 to using a historic three-year average to
20 forecast Fuel Management Program revenues. The
21 historic three-year average is \$138,000, which
22 results in an adjustment of \$39,000 to the
23 Company's forecast.

24

1 **ADR Deferred Tax Benefits**

2 Q. Please explain the Company's proposal regarding
3 its Asset Depreciation Range (ADR) Deferred Tax
4 Benefits.

5 A. During the Company's 2005 year-end closing
6 process, the Company discovered that the
7 deferred income taxes for several categories of
8 plant created under the ADR tax law were not
9 being properly amortized as a result of the
10 installation of a new tax accounting system in
11 2000. This accounting error occurred during the
12 period of 2000 through 2004. On August 11,
13 2006, the Company filed a petition for the
14 disposition of the 2000 and later ADR deferred
15 tax benefits not properly accounted for (Case
16 06-E-0990). The Petition is pending before the
17 Commission. The Company's proposal would defer
18 for customers' benefit the rate impact of
19 correcting the deferred ADR tax balance not
20 properly accounted for during the period of
21 2000-2004, as well as the recalculation of the
22 overearnings adjustment for the period of 2000-
23 2006. In this case, the Company proposes to
24 pass back to customers over a three-year period

1 the deferred principal and interest totaling
2 \$48,176,000.

3 Q. Does the Panel agree with the Company's
4 proposal?

5 A. Yes. The Panel agrees with the three-year
6 amortization of the ADR Deferred Tax Benefit of
7 \$48,176,000 to pass this amount back to the
8 customers. However, the accounting treatment
9 proposed in Case 06-E-0990 is pending before the
10 Commission. Therefore, this treatment should be
11 subject to update or reconciliation based upon
12 the final determination by the Commission.

13 **Direct Current Incentive Program**

14 Q. Please describe Con Edison's Direct Current (DC)
15 conversion program.

16 A. In the 1990's, Con Edison had a population of
17 over 4,000 customers taking DC service. The
18 Commission authorized the funding of a
19 conversion incentive program designed to
20 encourage these customers to convert from DC
21 service to alternating current (AC). The
22 program proved to be successful, and by petition
23 dated June 12, 2007 the Company reported that as
24 of that date only six customers remained on DC

1 service. The Company's petition seeks
2 Commission authorization to terminate the
3 provision of DC service effective September 30,
4 2007.

5 Q. What is the relevance of the DC incentive
6 program to the Company's rate filing?

7 A. The program has relevance to the rate case
8 because the Company has unexpended program funds
9 that rightfully belong to customers and can be
10 passed back to customers in this case.

11 Q. What is the level of unexpended funds?

12 A. As of June 30, 2007, the Company's financial
13 report indicates that there are \$11.2
14 million of unexpended funds related to the DC
15 conversion incentive program. In response to
16 Staff IR DPS-480, the Company projects that it
17 will have unexpended funds of \$9 million after
18 considering all remaining conversion costs and
19 interest on the deferred balance.

20 Q. What is your recommendation regarding the
21 disposition of the unexpended funds and
22 interest?

23 A. Given the magnitude of the requested rate
24 increase and the impact on customers, we

1 recommend that the entire balance be refunded to
2 customers as an offset to the revenue
3 requirement. We reflect our proposed
4 disposition as a \$9 million adjustment to rate
5 year other operating revenues. In addition we
6 reflect the average unamortized net of tax
7 balance of \$2.8 million as an offset to the
8 Company's rate base. Since the \$9 million is an
9 estimate and the basis for the estimate was not
10 provided by the Company, we recommend true-up
11 once the actual balance remaining is known.

12 **World Trade Center Costs**

13 Q. What does the Company propose with respect to
14 its World Trade Center (WTC) related costs?

15 A. Con Edison seeks to recover \$103.2 million of
16 deferred O&M expenditures and accrued interest
17 that relate to the WTC incident over a three-
18 year period, or \$34.4 million per year. In
19 addition, the Company seeks to recover \$86.1
20 million of deferred capital expenditures over a
21 thirty-year period, or \$2.9 million per year.
22 The unamortized deferred balances have been
23 included in the Company's rate base request.
24 The Company believes it is unlikely that it will

1 be reimbursed for these costs from government
2 sponsored programs.

3 Q. Does the Panel agree with the Company's belief
4 that it will not recover these funds from other
5 sources?

6 A. No. In fact, the Company has already recovered
7 a significant level of funds from various
8 sources. Moreover, we expect that the Company
9 will be reimbursed for other costs from
10 insurance and under the federally-sponsored
11 program.

12 Q. Please explain.

13 A. On June 11, 2007, Con Edison was reimbursed
14 \$54,294,317 for electric related WTC costs from
15 a federal government sponsored program - United
16 State Department of Housing and Urban
17 Development's appropriation for Utility
18 Restoration and Infrastructure Rebuilding, which
19 is administered by the Lower Manhattan
20 Development Corporation. In addition, based on
21 recommendations contained in an audit report
22 under this program, the Company recovered \$2.1
23 million from its insurers and is seeking an
24 additional \$12.4 million of WTC electric plant

1 expenditures from the Port Authority (see
2 response to Staff IR DPS-503). If the Company
3 is unsuccessful in recovering the \$12.4 million
4 from the Port Authority, the federal program
5 will reimburse the Company for 75% of the costs.
6 The Company's request to include in its rate
7 base nearly \$70 million of costs it has already
8 recovered or can reasonably expect to recover
9 prior to the start of the rate year is
10 inappropriate.

11 Q. Were these known changes reflected in the
12 Company's August 7, 2007 update?

13 A. No they were not. The costs are still included
14 in the Company's rate base request.

15 Q. Are there other WTC costs that the Company is
16 seeking recovery of from ratepayers that the
17 Company has an opportunity to recover from the
18 federally-sponsored program?

19 A. Yes. The Company seeks recovery of \$117.7
20 million of interference costs incurred through
21 March 2007. Approximately \$68 million relates
22 to expense activity and the remainder is capital
23 in nature. The Company is seeking three-year
24 recovery of expense interference costs and

1 thirty-year recovery of capital interference
2 costs. These costs qualify as reimbursable
3 costs under the federal program. However, the
4 Company has yet to file a claim under the
5 program.

6 Q. Does the Panel have any other concerns with the
7 Company's request?

8 A. Yes. Since September 11, 2001, the Company has
9 deferred all WTC-related costs and accrued
10 interest costs thereon. We discovered that
11 since March 2007, the Company transferred \$60.3
12 million of capital and retirement costs from the
13 deferral accounts to plant in service and the
14 depreciation reserve.

15 Q. Why is this change relevant to this proceeding?

16 A. Consistent with the terms of its current rate
17 plan, the Company reconciles Transmission and
18 Distribution (T&D) net plant balances to the
19 level provided in rates. As a result of the
20 transfer of costs to plant in service and the
21 reserve, carrying charges will be deferred on
22 WTC related costs in the reconciliation process.
23 The Company's rate filing includes an estimate
24 of interest costs through the start of the rate

1 year based on the assumption the cost remained
2 in the deferred accounts. If the transfer to
3 plant in service is not properly addressed, a
4 double recovery of carrying costs will occur,
5 once via the true-up of T&D costs allowed under
6 the rate plan and then again via the allowed WTC
7 cost deferral mechanism.

8 Q. Do you have any other observations that should
9 be noted?

10 A. Yes. Our review of the Company's supporting
11 workpapers revealed that the Company did not
12 fully reflect rate recoveries of WTC costs when
13 determining the level of costs it seeks recovery
14 of in this case. The current electric rate plan
15 provides for recovery of \$14 million per year,
16 or \$42 million over its term. The Company's
17 workpapers reflect recovery of \$36.1 million,
18 leaving \$5.9 million unaccounted for. Failure
19 to correct this error will also result in a
20 double recovery of costs by the Company.

21 Q. Please summarize your concerns with Con Edison's
22 proposed recovery of WTC costs?

23 A. There is uncertainty about the Company's
24 ultimate costs and reimbursement levels. The

1 Company is seeking recovery of WTC-related costs
2 from customers when neither the Company nor
3 Staff can definitively state what the net cost
4 will be. Estimates of various costs and
5 expected reimbursement levels are all that can
6 be offered. Costs are still being incurred and
7 the federal review process is still underway.
8 Even at this late date, much remains unknown
9 regarding the federal reimbursement levels. The
10 Company is seeking recovery of interference
11 costs from customers in advance of seeking
12 federal reimbursements and its filing does not
13 reflect any anticipated reimbursements for
14 interference costs. The Company's proposal to
15 include deferred costs and related deferred
16 interest in rate base is very problematic given
17 the known and expected changes that have not
18 been addressed by the Company. Failure to
19 address each of our concerns would result in
20 double recovery of costs and/or would result in
21 providing the Company with a return on
22 investments that it has been reimbursed by
23 taxpayers or insurance providers.

24 Q. How is this issue being addressed by the

1 Commission?

2 A. In 2001, Con Edison filed a petition with the
3 Commission in which it sought authority to defer
4 and recover its WTC-related costs, Case 01-M-
5 1958. The Commission found that it was
6 premature to consider the petition because other
7 avenues of recovery of these costs have not yet
8 been exhausted. We expect that once those
9 reimbursement options are settled, the
10 Commission will address the appropriate
11 treatment of these costs in that proceeding.

12 Q. Does the Panel have any interim recommendations
13 on this issue?

14 A. Yes. We recognize the extraordinary nature of
15 these expenditures and that in the end insurance
16 and other sources of reimbursement may not cover
17 all the underlying costs. While we have not
18 audited the WTC-related expenditures in any
19 significant detail, Staff has monitored the
20 Company's restoration and rebuilding activities
21 as well as Empire State Development
22 Corporation's review of the Company's
23 reimbursement claims. We recognize that the
24 ultimate determination as to the prudence of the

1 underlying costs will be the Commission's. We
2 believe that costs in excess of our recommended
3 recovery level here will be considered prudent
4 expenditures. Therefore, as an interim measure,
5 until all of the costs are known and all of the
6 reimbursement issues are settled, we recommend
7 that the Commission allow the Company to
8 continue the current rate treatment. Currently,
9 the Company is recovering and amortizing \$14
10 million of WTC related costs per year. In
11 addition, the Company is deferring carrying
12 charges on net of tax deferred balances at its
13 pre-tax rate allowance for funds used during
14 construction. Continuation of this treatment
15 will eliminate our concerns regarding errors and
16 the implications of known and expected changes
17 that have not been reflected by the Company.
18 The accrual of carrying charges on actual book
19 balances is, in essence, self correcting. This
20 approach by default addresses our concerns over
21 potential double recoveries and forecasting
22 errors by limiting the Company's return to
23 actual net investments. The recommended
24 amortization level is reasonable after

1 consideration of all our concerns. This
2 treatment should be subject to full
3 reconciliation based on actual expenditures net
4 of federal and insurance recoveries, the
5 establishment of appropriate amortization
6 periods for the various categories of both
7 capital and O&M expenditures, or other treatment
8 as the Commission may prescribe in Case 01-M-
9 1958. To reflect this recommendation, we
10 adjusted other operating revenues and eliminated
11 the deferred costs from the Company's rate base.

12 **Operation and Maintenance Expenses**

13 **Company Labor**

- 14 Q. Does the Panel propose an adjustment to Con
15 Edison's rate year Labor Expense forecast?
- 16 A. Yes. We are proposing several reductions to Con
17 Edison's rate year Labor Expense forecast.
- 18 Q. Do you agree with the Company's proposal to hire
19 a meteorologist for \$150,000?
- 20 A. No. The Company states that the meteorologist
21 would supplement its subscription weather
22 services by providing an independent review of
23 weather forecasting models to more accurately
24 determine expected local weather conditions.

1 The Company currently utilizes subscription
2 weather services that provide around the clock
3 information. The weather subscription services
4 employ teams of meteorologists with support
5 staff and highly sophisticated weather
6 equipment. The New York metropolitan area
7 receives significant coverage from the weather
8 services. The Panel does not agree that a
9 single Company meteorologist will more
10 accurately determine expected local weather
11 conditions simply by independently reviewing
12 other's weather forecasting models. Therefore,
13 we recommend that the Commission deny the
14 Company's request to fund a meteorologist.

15 Q. Do you agree with the Company's proposed program
16 changes for Finance and Accounting staffing?

17 A. No. In the Accounting Panel's testimony at page
18 56 the Company states, "Seven of the twelve
19 incremental employees are a result of an
20 assessment performed by KPMG LLP ("KPMG") of the
21 tax function in the Company." We requested a
22 copy of the assessment in Staff IR DPS-462,
23 however, to date, the Company has refused to
24 provide the assessment. The Company's

1 Accounting Panel then stated that, "Resource
2 levels were determined by KPMG to be not
3 comparable with that of peer companies. KPMG
4 recommended that the Company consolidate the tax
5 functions into one department, led by a Tax
6 Director or similar executive devoted solely to
7 tax matters." In Staff IR DPS-462, we requested
8 a cost benefit analysis for the additions to
9 Finance and Accounting, but one has not been
10 provided to date. Staff does not see the
11 benefit to the Company of adding six Senior Tax
12 Accountant/Attorney (\$750,000) and the VP-Tax
13 (\$230,000) based solely on a peer group Analysis
14 by KPMG, which the Company refuses to provide to
15 Staff and without a cost benefit analysis.

16 Q. Does the Panel agree with the Company's proposal
17 to add a Corporate Accounting-Financial
18 Reporting Accountant?

19 A. No. The Company's workpapers, entitled Line 64
20 Finance and Auditing, state, "Reflects an
21 incremental Accountant (2L) position (\$80K
22 annually) required to coordinate a complete
23 'plain English' review of our 10-K. In 2007, we
24 are planning to review the entire 10-K document

1 and re-write the document in a more user
2 friendly format." The Company has provided no
3 rationale as to why it cannot perform this
4 function with current employees.

5 Q. Does the Panel agree with the Company's proposal
6 to add a Corporate Accounting-Regulatory Filings
7 Accountant at \$80,000 annually?

8 A. No. The Company has provided no rationale as to
9 why the Company's current employees cannot
10 perform this task.

11 Q. Do you agree with the proposed incremental
12 hiring of two Senior Analysts for the Company's
13 Treasury Department?

14 A. No. In the Company's workpapers under Treasury
15 Department it states that, "The goal is to
16 rotate these employees into all sections of
17 Treasury with the objective of having them
18 replace annual turnover that can occur in an
19 organization." The result of this would be to
20 have two individuals perpetually rotating into
21 all sections of Treasury and funded in rates.
22 The indication that they would, "replace annual
23 turnover that can occur in an organization" does
24 not signify that there will be two or any

1 positions opening annually. The positions,
2 which total \$180,000 annually, should not be
3 perpetually pre-funded in rates.

4 Q. Do you agree with the proposed incremental
5 hiring of an analyst to be the Lease
6 Administrator for the Company's Real Estate
7 section at \$85,000 annually?

8 A. No. While the Company does cite what the
9 responsibilities for the analyst would be, it
10 does not explain what has changed in the
11 department to create the need for the position
12 or why staff currently handling these
13 responsibilities is insufficient.

14 Q. What is the total adjustment to Finance and
15 Accounting Labor based on the aforementioned
16 individual adjustments.

17 A. The aforementioned adjustments to Accounting and
18 Finance Staff total \$1,405,000, which agrees
19 with the total provided in the Company's
20 Exhibit_(AP-5), Schedule 6, Page 5 of 6, under
21 Finance & Auditing Human Resources - Hires. In
22 the Company's exhibit it shows electric
23 operations' allocation of this as \$1,024,000.
24 We recommend removing the entire amount of

1 \$1,024,000 from Finance and Accounting Labor
2 expense.

3 Q. Does the Panel propose any other labor
4 adjustments?

5 A. Yes. The Company's 2006 Annual Report reflects
6 redundant officers, Kevin M. Burke as Chairman
7 and CEO and Eugene R. McGrath as Chairman and
8 Trustee. The report indicates that Mr.
9 McGrath's term expired on March 1, 2006. In the
10 rate year we adjusted Labor expense for
11 salaries, life insurance costs, matching
12 contributions to the savings plan and deferred
13 income plan, for the removal of Eugene McGrath.
14 The 2006 Annual Report also indicates that the
15 Vice Chairman Joan Freilich term expires on
16 December 1, 2006. Additionally, in the rate
17 year, we adjusted for the expired term of Ms.
18 Freilich.

19 Q. What are the total for the adjustments to
20 Executive Compensation?

21 A. Based on the removal of the two aforementioned
22 Executives electric Labor expense should be
23 reduced by \$4,731,142. This amount is based on
24 electric operations allocation of 78.7 percent

1 of labor and other benefits which combined total
2 \$6,184,499 for Mr. McGrath and Ms. Freilich.

3 Q. Do you agree with the Company's proposed program
4 changes related to the Shared Services
5 Administration?

6 A. No. The Company's Accounting Panel indicates
7 that the goal of the Shared Services
8 Administrative group is to improve the
9 efficiency and effectiveness of its
10 organizations and affiliates. On page 43, the
11 Panel states, "It is estimated that as a result
12 of the restructuring and the formation of the
13 Shared Services Administration that savings will
14 be achieved over time. In this filing, the
15 Company assumes that the cost of the group will
16 be funded by achieved savings within five years.
17 The Company is in the early stage of this
18 initiative and there is no anticipated savings
19 in the first year. Thus, the Company is
20 reflecting 25 percent of the group's labor cost
21 as productivity savings, or \$222,000." The
22 Company's testimony did not provide a basis for
23 the productivity savings of approximately
24 \$222,000 in the rate year.

- 1 Q. Please continue.
- 2 A. In its reply to Staff IR DPS-496, Shared
3 Services Administration question d, the Company
4 indicated that the total labor costs incurred
5 for the Shared Services Administration for the
6 period of July 2006 through August 2007 were
7 \$1,390,000 and forecasted costs for the period
8 of September 2007 through March 2008 are
9 \$905,000 (for a total of \$2,295,000 incurred
10 prior to the rate year). Additionally, the
11 Company stated that, "The rate year level of
12 labor costs will be approximately \$1,552K
13 excluding wage award." The Company is
14 projecting that it will incur approximately
15 \$3,847,000 of labor costs in connection with the
16 Shared Services for the 32-month period of July
17 2006 through March 2009, of which \$2,805,000 is
18 allocated to electric operations, without any
19 identified program related savings. The Company
20 did impute \$222,000 productivity savings to
21 offset the labor costs in the rate year.
- 22 Q. Do you agree with the level of proposed savings?
- 23 A. No, we do not. In its testimony, the Company's
24 Accounting Panel identified increased efficiency

1 and improved effectiveness through
2 standardization, inter alia, as justification
3 for creating the Shared Services Administration.
4 However, in the rate year, the Company will
5 allocate \$1,131,576 of Shared Services
6 Administration labor to electric operations,
7 while proposing \$222,295 of productivity
8 savings. In effect, the Company's Shared
9 Services Administration will increase rate year
10 electric labor costs by \$909,281. As previously
11 noted, the Company expects the program to be
12 self-funding through achieved savings within
13 five years. By the end of the rate year, the
14 "five-year" period referenced by the Company
15 will be over half complete. Staff expects that
16 as of the rate year, the Company should be able
17 to achieve significant program savings in an
18 amount equal to at least the costs of operating
19 the Shared Services Administration. As a
20 result, we recommend the elimination of the
21 entire Shared Services Administration Labor
22 Expense net of imputed productivity, or an
23 adjustment of \$909,281.

24 Q. Do you have any other adjustments to Shared

- 1 Services Administration?
- 2 A. Yes. In the Company's Worksheet labeled Line 58
3 Shared Services Administration, other operating
4 expenses were allocated to electric operations.
5 The electric portion of these expenses are
6 forecast to be \$276,648 for the Rate Year.
7 Based on the aforementioned removal of labor
8 associated with the Shared Services
9 Administration, a tracking adjustment of
10 \$276,648 to Other O&M must also be made.
- 11 Q. Do you have any other adjustments to Labor
12 Expense that track adjustments made by Staff?
- 13 A. Yes. Based on the adjustments to Labor Expense
14 we made an adjustment to reduce the Labor
15 escalation by \$711,000.
- 16 Q. Do you have any adjustments to Payroll Taxes?
- 17 A. Yes. The Company's Exhibit___(AP-5), Schedule
18 1, Page 3 of 6, reflects Company Labor for the
19 12 months ending March 31, 2009 as \$562.8
20 million. Company Exhibit_(AP-5), Schedule 1,
21 Page 3 of 6, reflects Payroll Taxes for the 12
22 months ending March 31, 2009 as \$55.1 million.
23 The \$55.1 million in payroll taxes divided by
24 the Company Labor of \$562.8 million reflects an

1 effective Payroll Tax rate of 9.79%. This
2 matches the Tax Rate the Company provided
3 indicated for January 2009 in the Company
4 workpaper entitled Line 5 Payroll Taxes. We
5 recommend a Payroll Tax rate tracking adjustment
6 of 9.79% to reductions in Labor Expense of \$11.1
7 million, resulting in a reduction in Payroll
8 Taxes of \$1.09 million.

9 **Duplicate Miscellaneous Charges**

- 10 Q. Explain the proposed adjustment to Duplicate
11 Miscellaneous Charges.
- 12 A. The Company's rate year forecast of Duplicate
13 Miscellaneous Charges reflects no change from
14 the historic year level. This treatment is
15 inconsistent with the Company's forecast of the
16 underlying costs, which are O&M expenses. Our
17 rate year forecast of Duplicate Miscellaneous
18 Charges reflects general escalation from the
19 historic year level, consistent with the
20 Company's treatment of other O&M expense items.
21 Our adjustment increases the rate year Duplicate
22 Miscellaneous Charges by \$896,000, which has the
23 effect of reducing rate year total O&M expenses.
24

1 **Pension and OPEB Expense**

2 Q. Is there any adjustment to the Company's pension
3 and OPEB net expenses?

4 A. No. The Company's preliminary update reflects
5 the latest pension and OPEB actuarial
6 information available. We accept the Company's
7 updated pension and OPEB expense levels.

8 **Pension and OPEB Reconciliation**

9 Q. How does the Panel address the Company's request
10 to true up the pension and OPEB costs?

11 A. We recommend that the Company continue to
12 reconcile its actual pension and OPEB expenses
13 and tax benefits related to the Medicare
14 prescription drug subsidies to the level allowed
15 in rates, pursuant to the Pension Policy
16 Statement.

17 **Employee Welfare Expenses**

18 Q. Please explain the Company's forecast
19 methodology for employee welfare expenses.

20 A. The Company's health insurance costs forecast
21 for the rate year was developed based on
22 contract rates and the number of participants as
23 of February 7, 2007. Company witness Hector
24 Reyes states that he used three different

1 methods for escalating employee welfare
2 expenses. First, a labor factor of 6.39% was
3 used to escalate costs that are a function of
4 salaries and wages. Second, a non-labor factor
5 of 4.7% was used to escalate costs that are
6 unrelated to salaries and wages. Third, the
7 projected health care cost trend rates were used
8 to escalate hospital and medical costs at 8% and
9 prescription drug costs at 9.5%. The Company's
10 forecast of employee welfare expense is \$97.482
11 million for the rate year.

12 Q. Does the Panel agree with the Company's forecast
13 method?

14 A. No. The gross domestic product inflation
15 indexes reflect a basket of goods and services,
16 including health care services. On advice of
17 counsel, the application of a separate
18 escalation factor in projecting health care
19 costs, other than the general inflation factor,
20 is inconsistent with the Commission's practice,
21 as stated in Commission Opinion No. 84-27 issued
22 October 12, 1985. Our adjustment reflects the
23 latest known health costs plus general
24 inflation. In the response to Staff IR DPS-477,

1 the Company states that the latest known 2007
2 contract rates were used in the original
3 exhibit.

4 Q. Please explain the Panel's adjustment to
5 employee welfare expenses.

6 A. We start with the latest available information
7 on the Company's contract rates and number of
8 participants to determine the Company's costs
9 for the calendar year 2007. We then escalate
10 the 2007 health insurance costs by the general
11 inflation factor of 2.42% to calculate the costs
12 for the calendar year 2008. Then, we escalate
13 the 2008 forecast of health insurance costs by
14 the general inflation factor of 1.98% to
15 calculate the costs for the calendar year 2009.
16 Finally, we use a combination of nine months of
17 2008 costs and three months of 2009 costs to
18 forecast health insurance costs for the rate
19 year (12 months ending March 31, 2009). Our
20 approach results in a reduction of \$5.846
21 million to the Company's rate year level of
22 employee welfare expenses.

23 Q. Does the Panel have any other adjustment to
24 employee welfare expense?

1 A. Yes, our last adjustment tracks the reductions
2 in the rate year labor expense resulting from
3 various Staff adjustments to the Company's
4 proposed employee levels. Our adjustment
5 reduces rate year employee welfare expense by
6 \$1.019 million.

7 Q. Please explain.

8 A. We expressed our adjusted forecast of employee
9 welfare expense of \$91.636 million as a
10 percentage of the Company's total rate year
11 labor expense. The result was that employee
12 benefit expense represented 16.27% of rate year
13 labor expense. We apply the 16.27% benefit
14 factor to the total Staff proposed reductions to
15 labor expense of \$6.264 million. The result is
16 a reduction of \$1.019 million to rate year
17 employee welfare expense.

18 **East River Repowering Project Major Maintenance**

19 Q. What are the Panel's concerns related to the
20 East River Repowering Project (ERRP) major
21 maintenance costs?

22 A. We address three issues related to ERRP major
23 maintenance costs: 1) The Company's forecast of
24 ERRP major maintenance costs for the rate year;

1 2) The Company's proposal to establish and fund
2 a permanent reserve for ERRP major maintenance
3 costs; and 3) Disposition of the unexpended
4 maintenance funds at the end of the current
5 electric rate plan.

6 Q. Does Staff adjust the Company's forecast of ERRP
7 major maintenance costs in the rate year?

8 A. No. The Staff Production Panel reviewed the
9 Company's rate year forecast of ERRP major
10 maintenance schedule and costs. The Panel
11 supports the Company's \$7.5 million rate year
12 forecast.

13 Q. How does the Staff Accounting Panel view the
14 Company's request to fund a permanent reserve
15 for ERRP major maintenance?

16 A. The Company has failed to explain how reserve
17 accounting would benefit customers, especially
18 in a one year rate case when Staff supports the
19 Company's requested recovery of maintenance
20 costs from customers. The Panel sees no basis
21 for establishing a permanent reserve for ERRP
22 major maintenance costs when the Company can
23 reasonably estimate the amount and has relative
24 control over the timing of the occurrence of

1 such costs.

2 Q. How do you propose to address the unexpended
3 funds for ERRP major maintenance at the end of
4 the current electric rate plan?

5 A. The Company anticipates that it will have \$8.7
6 million accrued for major maintenance, but not
7 expended at the end of the current rate plan.
8 In consideration of the magnitude of the
9 requested rate increase, we propose that the
10 entire \$8.7 million be returned to customers as
11 a rate moderator. We also propose to include
12 the net-of-tax impact of \$2.622 million in rate
13 base, a reduction to the rate base.

14 **Informational Advertisement**

15 Q. Please explain the Informational Advertising
16 expense element and Staff's proposed
17 adjustments?

18 A. Informational Advertising includes the Company's
19 projected costs for general outreach and
20 education and public affairs. This Panel
21 proposes an adjustment to the public affairs
22 component. The Consumer Services Panel will
23 address an adjustment to the general outreach
24 and education components.

1 Q. Do you have any adjustments to Public Affairs
2 expense?

3 A. Yes. In the Company's workpaper entitled "Line
4 63 Public Affairs" under the Justification for
5 Energy Education and Customer Awareness it
6 states, "Con Edison uses advertising and
7 marketing to inform our customers and the public
8 about topics such as the need to maintain and
9 enhance the electric infrastructure, energy
10 conservation, and how to contact us in the event
11 of an emergency." In the same worksheet, the
12 Company forecasts the funding for the programs
13 to increase from \$10,501,000 for "Actual 2006"
14 to \$19,001,000 for "Forecast RYE 2009", an
15 increase of 81%. Electric operation's
16 allocation of this increase would be \$6,897,000.
17 In the Company's reply to Staff IR DPS-392,
18 question c, it indicates that, in 2006, \$3.2
19 million was spent on the Energy Education
20 Program and \$2.8 million was spent on the
21 Working For You program. In the response to
22 question b of the same IR, the Company states,
23 "The benefit to the customer is that they will
24 have access to more information on how they can

1 take control of their energy usage." We believe
2 that this is insufficient to support an increase
3 in Public Affairs expense of 81% and recommend
4 that the request for the \$6,897,000 be denied.

5 **Insurance Expense**

6 Q. Do you agree with the Company's rate year
7 forecast of Insurance Expense?

8 A. No. Con Edison's Insurance Expense for the
9 years 2004-2006 were \$27,220,800, \$24,931,200
10 and \$24,071,400, respectively, indicating a
11 declining trend. The Company's Insurance
12 Expense program change of \$5,353,300 is an
13 increase of 22% over the historic year. In the
14 Company's response to Staff IR DPS-436, it
15 states that, "The program change of \$5.354
16 million for Insurance premiums on line 41
17 assumes a 10%/annum increase in premiums after
18 escalation." In the Company's workpapers, the
19 Company forecasted an increase of 17% in
20 liability insurance from the April 2007 premium
21 of \$876,200 to the June 2007 estimated premium
22 of \$1,016,500. The Company's general ledger
23 reflects that the premium for June 2007 was
24 \$901,761, an actual increase of 2.9% over the

1 \$876,200 in April 2007. In addition, in the
2 Company's response to Staff IR DPS-481, Question
3 13, it provided insurance premium expenses
4 comparing "As Filed July 2007" to "Actual 2007".
5 This response shows that several of the premiums
6 are actually decreasing. Based on the latest
7 known premium change and the aforementioned
8 declining trend for Insurance, the Panel used
9 the 2.9% annual growth rate to arrive at a
10 reduction of \$3,752,129 to Insurance Expense.

11 **Interference Expense**

12 Q. Does the Panel propose any adjustments to the
13 Company's interference expense forecast?

14 A. Yes, we are proposing several adjustments which
15 reduce the Company's interference expense
16 forecast by \$11.586 million from the allowance
17 proposed in the Company's August 2007 update.

18 Q. Please explain the process used by the Company
19 to develop its rate year interference expense
20 forecast.

21 A. In his testimony, Company witness Gencarelli
22 states that the Company's rate year interference
23 expenses are based on the level of capital work
24 to be performed by New York City (NYC) in the

1 rate year. Three times annually, in its Capital
2 Commitment Plans, NYC identifies the capital
3 projects it anticipates for the up coming year.
4 Of the projects identified in the Commitment
5 Plan, NYC estimates the percentage of projects
6 it expects to complete in the year; this
7 estimate is referred to as the commitment
8 target. In the January 2007 Capital Commitment
9 Plan, NYC expected to complete approximately 66%
10 of the plan projects. The Company projected its
11 rate year interference expense by multiplying
12 NYC's capital commitment target by 100.7%, to
13 arrive at the expected NYC capital expenditures.
14 The Company then multiplied the expected NYC
15 capital expenditures by 11.7%, in order to
16 determine the total Company's interference
17 expense for the rate year. This number was
18 further refined by multiplying the total Company
19 interference expense by 76% in order to arrive
20 at the electric department's interference
21 expense. Mr. Gencarelli indicated that the
22 ratios used to calculate the Company's forecast
23 were developed by comparing the historic levels
24 of capital work projected in NYC's Capital

1 Commitment Plan to the Company's historic
2 interference expense experienced in
3 corresponding calendar year. Workpapers
4 provided by the Company show the calculation of
5 each percentage used.

6 Q. Did the Panel review the workpapers provided?
7 If so, what did the Panel find?

8 A. Yes, we reviewed the workpapers provided. Our
9 review revealed that there were two errors in
10 the workpapers that impacted the percentages
11 used by the Company.

12 Q. Please explain the first error?

13 A. On page 10, line 12 through 14, of his
14 testimony, Mr. Gencarelli states that the four-
15 year average of the ratio of NYC capital
16 commitment targets to the actual NYC
17 expenditures was 100.7%; that is, NYC completed,
18 on average, 100.7% of the capital commitment
19 targets it projected over the four-year period
20 of 2003 through 2006, inclusive. A review of
21 the calculation reveals that the four-year
22 average for 2003 through 2006 should be 98.3%.
23 In its response to Staff IR DPS-186, the Company
24 agreed that the 100.7% factor used in its

1 interference expense forecast was incorrect and
2 that the 98.3% was the correct percentage for
3 the four-year average.

4 Q. Please explain the second error found in the
5 Company's interference expenditure workpapers.

6 A. On worksheet 1 for Exhibit_(TMG-2), the Company
7 calculates the 11.7% used to quantify the
8 Company's interference expense. The Company
9 used the four-year average of the ratio of NYC
10 capital expenditures to the Company's
11 interference expenditures to develop the 11.7%
12 used in its calculation. Worksheet 1 for
13 Exhibit_(TMG-2) reports the 2003 total Company
14 O&M for interference expense as \$71.102 million,
15 while work sheet 2 for Exhibit_(TMG-2) reports
16 the 2003 total Company O&M for interference
17 expense as \$68.575 million. In response to
18 Staff IR DPS-434, the Company indicated that the
19 worksheet 2 amount of \$68.575 million is
20 correct. Substituting the worksheet 2 amount
21 into the calculation reduces the ratio of NYC
22 interference expenditure to Company interference
23 expenditure to 11.6%.

24 Q. Did the Panel make any other adjustments to the

1 Company's interference expense forecast?

2 A. Yes. Mr. Gencarelli based his forecast of
3 interference expense on NYC's forecast of its
4 capital expenditures to be completed during the
5 rate year. Since Mr. Gencarelli's forecast was
6 based on projections of futures expenditures
7 presented in rate year dollars, it is not
8 necessary for the Company to increase its
9 forecast of this expense element for inflation.
10 However, in their Exhibit___(AP-5), Schedule 1,
11 page 3 of 6, the Company's Accounting and
12 Finance Panel did apply the general escalation
13 factor of 4.7%, increasing expenses by \$4.776
14 million. As indicated in response to Staff IR
15 DPS-435, the Company agrees that the general
16 escalation factor should not be used and states
17 that the Company's August update incorporates
18 the Panel's adjustments.

19 Q. Has the Panel reviewed the August update? If
20 so, does the Panel agree that the Company has
21 incorporated its proposed adjustment?

22 A. We have reviewed the August update. The
23 Company's update did include schedules that
24 incorporate the adjustments discussed. However,

1 the Company's update did not include the actual
2 calculation of the updated rate year
3 interference expenditures (\$103.656 million).
4 In discussions with the Company while
5 investigating the rate filing update, we were
6 made aware of Exhibit TMG-2 Revised, which shows
7 the calculation of the updated rate year
8 interference expenditures. We expect that
9 Exhibit TMG-2 Revised will be formally submitted
10 in a September update.

11 Q. Does the Panel agree with the updated rate
12 allowance for interference expenses?

13 A. No, we do not. Again, based on our
14 understanding of Exhibit TMG-2 Revised, in its
15 update, in addition to the corrections
16 previously discussed, the Company updated its
17 projections to incorporate NYC's April 2007
18 updated Capital Commitment Plan. In addition to
19 an update of the projects anticipated in the
20 January 2007 Capital Commitment Plan, the April
21 Report increased the commitment target ratio
22 from 66% to 89% for the capital projects to be
23 completed in 2009.

24 Q. Does the Panel support the 89% commitment

1 target?

2 A. No. We reviewed each Capital Commitment Plan
3 report issued during the Company's averaging
4 period, as well as the two most recent reports
5 (i.e., January 2003 through April 2007) and
6 observed that the commitment target ratio
7 predictably moved in a cycle. In each year, the
8 January Capital Commitment Plan commitment
9 target ranges from 62% to 66%, the commitment
10 target increased in the mid-year report (issued
11 in either April or May) to a range of 81% to
12 96%, and then drops back in the September
13 report, to a range of 64% to 67%. We
14 recalculated the interference expense using the
15 Company's methodology, updating for the
16 corrections discussed earlier, incorporating the
17 project changes contained in the April 2007
18 Capital Commitment Plan, but using the average
19 September 2003 to 2006 report commitment target
20 ratio (65%).

21 Q. Does the Panel propose any additional changes?

22 A. Yes. In its update, the Company removed the
23 full \$4.776 million escalation from its
24 interference expense forecast. However, when

1 initially forecasting the rate year interference
2 expense, the Company used the historic level of
3 interference expense as its starting point,
4 then, increased that historic level for the
5 forecasted program changes. The Company's
6 historic interference expense included \$2.326
7 million of labor not included in the Company's
8 labor expense element. As a result, the Panel
9 recommends the Commission allow an escalation on
10 the labor component of the interference expense.
11 This labor increase, at the labor escalation
12 rate of 6.39%, is \$.148 million.

13 Q. What level of interference expense is the Panel
14 proposing for the rate year?

15 A. Incorporating the adjustments discussed, we are
16 recommending an allowance of \$92 million for
17 interference expenses.

18 Q. In his testimony, Company witness Gencarelli
19 proposes changing the method of reconciliation
20 relating to interference expense from a 2.5%
21 dead-band around the rate year estimate to a
22 full true-up of actual expense to rate year
23 forecast. Does the Panel support the Company's
24 proposal?

1 A. No. Due to the magnitude of the Company's rate
2 request, coupled with the fact that the rate
3 year forecast for interference expense is 27%
4 greater than the average interference expense
5 over the last four years, we recommend that the
6 Company be required to reconcile its actual
7 interference expense up to the rate allowance,
8 deferring any over-recovery for future refund to
9 customers. Interference expense in excess of
10 the rate allowance should be borne by the
11 shareholder. This should encourage the Company
12 to coordinate its interference expenditure work
13 closely with NYC in order to ensure efficient
14 use of resources.

15 **Site Investigation and Remediation**

16 Q. Does the Panel propose any adjustments to the
17 Company's site investigation and remediation
18 expense forecast?

19 A. Yes. The Panel has made adjustments to the site
20 investigation and remediation (SIR) expense in
21 both the linking period (12 months ending March
22 31, 2008) and the rate year. Additionally, we
23 recommend a five-year amortization period,
24 instead of the three-years proposed by the

1 Company.

2 Q. Please explain the adjustments the Panel is
3 proposing to the SIR expense.

4 A. In response to Staff IR DPS-430, the Company
5 revised its projections for the level of SIR
6 expense that will be completed during the
7 linking period. The Company now projects it
8 will incur \$55.6 million of SIR costs in the
9 linking period, of which \$43.8 million is
10 allocated to electric operations. The revision
11 is approximately \$16.8 million less than the
12 projected electric SIR expense included in the
13 Company's August 7, 2007 update. Since the
14 Company's rate filing included recovery of
15 excess SIR expense incurred during the linking
16 period, in excess of the \$8.9 million currently
17 allowed in rates, these program changes reduce
18 the projected rate year allowance.

19 Q. Does the Panel have any additional adjustments?

20 A. Yes. We are also proposing adjustments to the
21 rate year SIR expense.

22 Q. Please explain these adjustments.

23 A. We are proposing three adjustments to the rate
24 year SIR expense. Two adjustments relate to

1 specific SIR activities projected to be
2 completed during the rate year. The first
3 activity relates to the proposed remediation at
4 the Purdy Street Station Manufactures Gas Plant
5 (MGP) site. A portion of this activity includes
6 remediation of parts of the grounds of St
7 Raymond's High School, which is operated under
8 the auspices of the Archdiocese of New York.
9 The remediation for the site that includes the
10 St. Raymond's property must be completed to the
11 New York State Department of Environmental
12 Conservation's (DEC) "unrestricted use"
13 standard. In response to Staff IR DPS-376, the
14 Company states," the remediation program being
15 considered for the Purdy Street Station Site
16 includes a "restricted use" cleanup coupled with
17 engineering and institutional controls. Under
18 the DEC's Voluntary Cleanup Program, remedies
19 that include such controls can be approved by
20 DEC only if the owner of the property executes
21 and records a Declaration of Restrictions and
22 Covenants or an environmental easement that
23 makes those controls binding on future property
24 owners and enforceable against them by the DEC."

1 In the same response, the Company acknowledged
2 that "...the Archdiocese's input on the scope of
3 the remediation program for the Purdy Street
4 Station and consent to any institutional
5 controls called for by the program is
6 essential." In September 2005, the Company
7 provided the Archdiocese with several
8 remediation options for its review. As of
9 August 7, 2007, the Archdiocese has not provided
10 the Company with its opinions on the proposed
11 remediation plans. We do not expect that this
12 project will be completed on the schedule
13 projected by the Company. Removing this project
14 reduces the rate year electric SIR expense by
15 \$2.2 million. The second adjustment the Panel
16 proposes relates to the West 45th Street Gas
17 Works site. This activity relates to the
18 redevelopment of a parking lot located near the
19 Intrepid Air, Sea and Space Museum. In response
20 to Staff IR DPS-377, the Company indicated it
21 received some preliminary information on the
22 redevelopment plan, but it has not received
23 detailed designs or a firm schedule. The
24 Company states that, "[b]ecause combining the

1 remediation of the Intrepid parking lot with its
2 redevelopment will likely result in significant
3 cost savings to Con Edison and its customers,
4 the Company does not plan to proceed with
5 remediation of the parking lot until the
6 property is ready to be redeveloped." Removing
7 this project reduces the rate year electric SIR
8 expenses by \$7.4 million. The final adjustment
9 the Panel proposes to the SIR captures the tax
10 credits the Company expects to recover related
11 to completed remediation activities. In
12 response to Staff IR DPS-374, the Company
13 indicated that it expects to receive
14 approximately \$0.4 million of tax credits under
15 the DEC's Brownfield Cleanup Program. We
16 propose to use the portion of these tax credits
17 attributed to the electric department, or \$0.3
18 million, as an offset to the rate year expenses.

19 Q. Please explain the Panel's recommendation for a
20 five-year amortization period for SIR expense.

21 A. The Company's rate filing proposes a three-year
22 amortization period to recover the rate year SIR
23 expense. The current electric Rate Order
24 provides the Company with an \$8.9 million rate

1 allowance for SIR. In response to Staff IR DPS-
2 176, the Company indicated that the use of a
3 three-year amortization period was "consistent
4 with the time period included in Case 04-E-
5 0572". However, as indicated in a response to
6 Administrative Law Judge Lynch's question
7 regarding the SIR allowance provided in the
8 Joint Proposal in Case 04-E-0572, the current
9 rate allowance was developed using a five-year
10 amortization period. The response to ALJ
11 Lynch's question is provided in Exhibit____(AP-
12 3). In light of the substantial increase in the
13 requested level SIR expense, and in an effort to
14 mitigate current customer bill impacts, the
15 panel supports the continuation of a five-year
16 amortization instead of the Company's proposed
17 three-year amortization.

18 Q. How do the adjustments proposed and the change
19 in amortization period impact the rate request?

20 A. The adjustments proposed by the Panel decrease
21 the electric portion of the SIR expense for the
22 rate year by approximately \$25.7 million.
23 However, the longer amortization period will
24 result in a larger portion of the rate year SIR

1 costs going unrecovered, which are subject to
2 carrying charges.

3 Q. Does the Panel support the Company's proposal
4 for full reconciliation of SIR costs?

5 A. Yes, we support a full reconciliation of the SIR
6 costs.

7 **Postage**

8 Q. Does the Panel propose any adjustments to
9 postage expense?

10 A. Yes.

11 Q. Please explain your adjustment.

12 A. In its rate filing, the Company increased the
13 historic test year postage expense by 7.6%, to
14 reflect the average increase in US Postal
15 Service rates that went into effect on May 14,
16 2007 (approximately a \$1 million increase to
17 postal expense). The Company then applied the
18 general escalation factor to arrive at the
19 projected rate year postage expense, an increase
20 of an additional \$0.6 million. We are reducing
21 postage expense by \$0.6 million to eliminate the
22 general escalation from the rate year allowance.

23 Q. Please explain why the Panel is making this
24 adjustment.

1 A. In response to Staff IR DPS-80, the Company
2 states that the May 2007 postal rate increase
3 was "designed to carry the Postal Service
4 through the fiscal years through September 2008.
5 The Company further escalated postage cost for
6 the September 2008 through March 31, 2009 time
7 period." The Company used the general
8 escalation rate, which is designed to increase
9 costs over the 27-month period from the end of
10 the test year through the rate year, to increase
11 costs for the six-month period October 1, 2008
12 through March 31, 2009. In its response, the
13 Company acknowledged that the general escalation
14 factor was not the appropriate rate to use to
15 escalate costs for this period. According to
16 the Company, the correct escalation rate for
17 this period is 1.04%. The Company stated that
18 it would reduce postage expense by \$0.5 million
19 when it submitted its updates. However, a review
20 of the August 2007 update shows no such
21 reduction.

22 Q. Is the Panel proposing an additional reduction?

23 A. Yes. We propose to remove the escalation. The
24 Company's proposed escalation increase is

1 predicated on the proposition that the Postal
2 Service will have new rates in effect on October
3 1, 2008. We disagree. The Postal Service has
4 not announced any intention to increase rates as
5 of that date. A review of the last ten Postal
6 Service rate increases, dating back to February
7 17, 1985, reveals that the average period
8 between increases is 32 months. As a result, we
9 project that there will be no increase in the
10 rate year. In addition, the increasing use of
11 the internet should help ameliorate the effect
12 of future postal rate increases. In response to
13 Staff IR DPS-80, the Company provided data
14 relating to the number of customers that receive
15 their monthly Con Edison bills via e-mail (e-
16 bill). The data indicate that the average
17 number of customers receiving monthly e-bills
18 has increased by 470% from 2004 through June
19 2007. In 2004, only 0.7% of total customers
20 received bills via e-mail; in 2006 that number
21 increased to 3.1%. The Panel expects that that
22 number could exceed 5% in the rate year. At
23 that level of e-bill participation, the Company
24 could expect a net decrease of \$0.1 million in

1 postage expense (net of customer growth).

2 **Rents - ERRP Carrying Charge**

3 Q. Does the Panel have any issues with Con Edison's
4 forecast of ERRP carrying charges?

5 A. Yes. The Company's original filing contained a
6 few errors, including the tax amortization
7 period for certain capitalized overheads and the
8 forecast of the deferred state income tax
9 balances. The Company's preliminary update
10 filing corrected these errors as well as updated
11 for actual ERRP plant additions through June
12 2007. Staff accepts the Company's updated
13 forecast of ERRP carrying charge rents paid to
14 steam which increase rate year expense by \$3.949
15 million.

16 Q. Does the change in ERRP carrying charges affect
17 the Company's delivery revenue requirement?

18 A. It does not affect the delivery revenue
19 requirement, because the Company recovers the
20 expense through the Monthly Adjustment Clause
21 (MAC). The Company's update filing included an
22 increase in forecasted rate year MAC revenues
23 that fully offsets the expense increase.

24

1 **Shared Services**

2 Q. Does the Panel propose any adjustment to the
3 Company's shared services costs?

4 A. Yes. Shared services reflect net billings
5 between Con Edison and its affiliates for
6 allocation of certain corporate costs and direct
7 services performed between the Company and its
8 affiliates, including Orange and Rockland
9 Utilities (O&R) and Con Edison's holding
10 company, Consolidate Edison, Inc. (CEI). The
11 Company's documents supporting the development
12 of the rate year shared services costs indicate
13 a very complicated process. The Company's
14 original filing contained a few errors. In
15 response to Staff IR DPS-182, the Company
16 provided corrections to its original filing.
17 The Company further revised the shared service
18 forecast in its preliminary update. The update
19 still included errors. Staff proposes to keep
20 the rate year shared services costs as provided
21 by the Company in its response to DPS-182 until
22 the Company provides all required information.
23 If adjustments are appropriate, we will propose
24 them at a later date. We reserve our right to

1 update our testimony at the hearing.

2 Q. How does the shared service cost provided in the
3 Company's response to Staff IR DPS-182 change
4 the Company's forecast?

5 A. The rate year shared service costs provided in
6 that response is a negative \$7.989 million,
7 which reduced the shared service costs by \$1.381
8 million from the Company's update.

9 Q. Does the Panel have any concerns with the
10 Company's development of the shared service
11 expense?

12 A. Yes. The Company's forecast methodology appears
13 to be overly complex and prone to produce
14 errors. We are working with the Company to
15 streamline the process for future filing. Our
16 goal is to produce a "roadmap" that ties
17 directly back to the net affiliate billings to
18 Con Edison's element of expenses, such as
19 employee pension and OPEB expense, employee
20 welfare expenses, shared services expense, and
21 all other such expenses.

22 **Uncollectible Expense**

23 Q. How does the Panel address the Company's request
24 to unbundle uncollectible expense?

1 A. The Company proposed to remove the portion of
2 uncollectible expense related to fuel and
3 purchased power costs from the delivery revenue
4 requirement. If approved, the Company will
5 recover the uncollectible expense related to
6 energy costs through the Market Supply Charge
7 (MSC) and Monthly Adjustment Clause (MAC), based
8 on actual fuel and purchased power expenses. We
9 agree that unbundling the uncollectible expenses
10 will better match the recovery of the expenses
11 with actual revenue billed, and also reduce the
12 Company's uncollectible accounts risk due to
13 market prices volatility. We recommend the
14 Commission approve the Company's request to
15 unbundle uncollectible expense.

16 **Water Expense**

17 Q. Explain your proposed adjustment to water
18 expense.

19 A. The Company projected an 8.7% annual increase in
20 water expense in 2007 and 2008, based on the
21 statements from NYC's Water Board. In addition,
22 the Company applied a 4.7% general inflation
23 factor to the forecasted water cost in the rate
24 year. Since the company has separately

1 forecasted increases in water rate, the
2 application of general inflation is not
3 appropriate. We recommend a reduction of
4 \$35,000 to the Company's rate year water expense
5 to reflect the elimination of the general
6 inflation.

7 **Other O&M Expense**

8 Q. Do you have any other adjustments?

9 A. Yes. In the Company's response to Staff IR DPS-
10 8, Con Edison it provided Attachment Staff 2-8.
11 On page 1 of this attachment, Deferred
12 Compensation is indicated at \$14,146,000.
13 According to the Company's response to Staff IR
14 DPS-517, the \$14.1 million is the electric
15 operations' allocation of the Stock-Based
16 Compensation of \$18 million reflected in Note M
17 on p.103 of Con Edison's 2006 10-K. The
18 \$14,146,000 consists of stock options
19 (\$44,815,000), restricted stock (\$369,000),
20 performance based restricted stock (\$8,084,000),
21 non-officer director deferred stock (\$872,000)
22 and other (\$6,000). In Note M, it states, "The
23 Stock Option Plan (the 1996 Plan) provided for
24 awards of stock options to officers and

1 employees for up to 10 million shares of Con
2 Edison Common Stock. The Long Term Incentive
3 Plan (LTIP) among other things, provides for
4 awards of restricted stock units, stock options
5 and, to Con Edison's non-officer directors,
6 deferred stock units for up to 10 million shares
7 of common stock..." On the advice of counsel, it
8 is Commission policy that the recovery of
9 incentive payments may not be recovered from
10 customers. Based on this, the Panel recommends
11 an adjustment of \$14.8 million to remove the
12 Stock Options labeled as Deferred Compensation
13 under Other O&M Expense and the associated
14 escalation of 4.7%.

15 **Inflation**

16 Q. Do you have adjustments to inflation?

17 A. Yes. Based on the Panel's and other Staff
18 witnesses' testimony, we are reducing inflation
19 expense by \$814,000.

20 **Property Tax Expense**

21 Q. Does the Panel have an adjustment to rate year
22 Property Tax Expense?

23 A. Yes.

24 Q. What is the basis of your adjustment to rate

1 year property tax expense?

2 A. Our adjustment to the Company's property tax
3 expense reflects our use of actual NYC property
4 tax rates for the 2007-2008 tax year, which
5 became known after the Company filed its case.
6 We also forecasted the tax rates for the 2008-
7 2009 tax year using an escalation factor based
8 on the average growth rates for the past five
9 years.

10 Q. How did the Company determine its rate year
11 estimate of NYC property tax expense?

12 A. In its original filing, the Company forecasts
13 the rate year level based on the forecast
14 assessed values of the electric properties,
15 including forecast construction expenditures,
16 and estimated tax rates for properties that are
17 classified as class 3 and class 4. The
18 Company's estimated tax rates would be held
19 constant at the 2006-2007 level.

20 Q. Do you agree with the Company's original
21 assumption regarding tax rates?

22 A. No, we do not. For the past couple of years,
23 NYC tax rates have actually been declining. For
24 the 2008 fiscal year, NYC approved a 7% decrease

1 in property tax rates. We recomputed the rate
2 year property tax expense using the actual 2007-
3 2008 tax rates and estimated tax rate decreases
4 of 1.61% for Class 3 properties and 2.62% for
5 class 4 properties for the 2008-2009 tax year.

6 Q. What is the impact on the rate year property tax
7 expense forecast as determined by the Panel?

8 A. For the rate year, our changes result in a
9 decrease of \$37.975 million in the level of
10 property tax expense as compared to the level
11 reflected in the Company's original filing. In
12 its update however, the Company revised its
13 forecast to reflect a \$26.388 million decrease
14 from the original level. The Company's updated
15 forecast results from the Company applying the
16 now known 2007-2008 tax rates. In addition, its
17 update reflected the application of actual
18 assessments for the fiscal year 2007-2008 as
19 opposed to the estimated level computed in its
20 original filing and the effects of the Mott
21 Haven Substation that were discussed on page 33
22 of Company witness Hutcheson's testimony.

23 Q. Have you taken into account those new facts?

24 A. Yes, we revised our forecast to reflect the

1 actual 2007-2008 assessments and to include the
2 effect of the Mott Haven tax benefits. Our
3 adjustment to the Company's originally filed
4 rate year expense is \$28.156 million. This
5 adjustment reflects an additional \$1.771 million
6 reduction to the Company's August 7, 2007
7 updated level of property taxes.

8 Q. Does your proposed adjustment have any other
9 impact on the rate year revenue requirement?

10 A. Yes. As a result of the changes, the estimated
11 prepayment property tax expense included in the
12 Company's working capital component of rate base
13 should be reduced by \$6.636 million. The
14 Company reflected \$5.916 million of this change
15 in its August 7, 2007 update.

16 **Reconciliation and Deferred Accounting Property Taxes**

17 Q. On pages 18-19 of Company witness Rasmussen's
18 testimony, he proposes to employ the use of
19 deferred accounting to true-up property taxes to
20 actual expense levels. Do you support the
21 Company's request for reconciliation accounting
22 for property taxes?

23 A. No. We do not support the proposal to reconcile
24 property tax expense.

1 Q. Please explain your objection to reconciling
2 property tax expense.

3 A. Property tax expense can be reasonably
4 forecasted for the rate year and it is very
5 unlikely that the expense will vary
6 significantly from the forecasted levels in the
7 rate year. In fact, a portion of the rate year
8 expense is already known. Given the shortened
9 forecast period, reconciliation treatment is
10 unnecessary.

11 Q. Regarding the treatment of property tax refunds
12 and assessment reductions, do you agree with the
13 Company's proposal to continue the current
14 86/14% Customer/Company sharing mechanism?

15 A. Yes, we do.

16 **Rate Base - Earnings Base Capitalization (EBC)**

17 A. What is the purpose of the EBC calculation?

18 Q. The EBC is a computation intended to bring rate
19 base and capitalization into phase so that the
20 basis upon which a utility is given an
21 opportunity to earn return reflects only the
22 investor-supplied capital dedicated to public
23 service. Simply stated, the EBC comparison
24 represents the difference between the

1 capitalization, or the earnings base and rate
2 base.

3 Q. What data is used to calculate the EBC?

4 A. Traditionally, the EBC is based on data from the
5 Company's books and records for the historical
6 year or test year. In this instance, the test
7 year is the year ended December 31, 2006.

8 Q. Please quantify the impact of your proposed EBC
9 adjustments.

10 A. Our adjustments reduce the Company's rate year
11 rate base by \$202.6 million.

12 Q. Please explain your adjustments?

13 A. The adjustments affect two sections of the EBC
14 computation: capitalization and rate base. Upon
15 examining the historical data, we realized that
16 certain items included in the capitalization
17 required adjustment. We recommend the following
18 adjustments to capitalization for interest-
19 bearing items: 1) The exclusion of deferred
20 Retail Access Phase 5 costs in the amount of
21 \$1.747 million since there was no remaining
22 balance on the Company's books in the historical
23 year. 2) The reduction of the deferred Gain on
24 Sale of First Avenue properties by \$2.424

1 million to reflect the electric allocation of
2 the proceeds. 3) The exclusion of deferred Mid-
3 Hudson Site costs amount of \$0.434 million,
4 since the balance is non-interest bearing.
5 As we will discuss in greater detail, we also
6 recommend that capitalization be adjusted to
7 reflect the impact of certain pension credits
8 totaling \$147.1 million.

9 To historical rate base, we recommend the
10 following:

11 1) The historical cash working capital (CWC)
12 allowance is comprised of the total O&M expenses
13 less certain expenses, such as Pensions expense,
14 which require no financing between the time they
15 are recognized for accounting purposes and their
16 recovery from customers. While the per book
17 level of pension expenses, as included in the
18 total O&M, correctly reflects the effects of a
19 Medicare Prescription Part D subsidy, the
20 Company did not take into account this credit
21 when computing the historic CWC allowance. This
22 created a mismatch between the amount included
23 in the total O&M and the amount excluded in the
24 determination of the CWC allowance. The Panel's

1 application of the correct expense level in the
2 CWC computation results in an adjustment of
3 \$2.942 million, with a correlative effect on the
4 EBC.

5 2) The pro-forma rate base exhibit used by the
6 Company to determine the rate year working
7 capital includes an allowance for working
8 capital related to Purchased Power. The
9 Accounting Panel indicated on page 83 of its
10 testimony that this allowance was based on a
11 time lag between fuel billed and payment
12 collected from the customers. This working
13 capital allowance however, was not taken into
14 account in the computation of the historical
15 working capital; thus creating a discrepancy.
16 For purposes of consistency, we computed the
17 allowance for the historical year using the same
18 methodology employed by the Company. This
19 adjustment reduces the EBC adjustment by \$49.267
20 million.

21 3) The Excess Deferred State Income Tax
22 balance was also adjusted by \$0.4 million to
23 correct for an error in the calculation of the
24 average balance for the historical year.

1 In summary, our proposed adjustments result in a
2 decrease in the Company's EBC adjustment of
3 \$202.6 million.

4 **Prepaid Pension - EBC**

5 Q. Did Con Edison include its prepaid pension
6 expense in its rate base request?

7 A. Yes. The Company's Accounting Panel, on page
8 71, acknowledges that the Company included its
9 prepaid pension expense in its rate base
10 compilation as part of its Earnings base versus
11 capitalization (EBC) measure. The Company
12 indicated that its inclusion is one of the
13 reasons that its earnings base is larger than
14 its rate base.

15 Q. Does Staff have any concerns with Con Edison's
16 proposed treatment?

17 A. Yes, the majority of the prepaid pension balance
18 was amassed while the Company was off the
19 Statement of Policy and Order Concerning the
20 Accounting and Ratemaking for Pensions and Post
21 Retirement Benefits Other Than Pensions (Case
22 91-M-0890, issued September 7, 1993)(Pension
23 Policy Statement). Moreover, a significant
24 portion of the so-called prepaid pension expense

1 does not represent a cash investment for Con
2 Edison.

3 Q. For what period was Con Edison's electric
4 operation off the Pension Policy Statement?

5 A. Con Edison went off the Pension Policy
6 Statement, effective April 1, 1997, consistent
7 with the terms of the rate plan adopted by the
8 Commission in Case 96-E-0897. Electric
9 operations returned to the provisions of the
10 Pension Policy Statement effective April 1,
11 2005.

12 Q. How large is the prepaid pension expense?

13 A. Con Edison has accumulated a significant prepaid
14 pension expense balance. As noted by the
15 Company's Accounting Panel, the average balance
16 of the electric prepaid pension expense was
17 \$1.144 billion for the historic year ended
18 December 2006.

19 Q. How do prepaid pension expense balances arise?

20 A. There are two ways a prepaid pension balance can
21 occur. It can occur when management, at its
22 discretion, makes contributions to, or funds,
23 its pension plan with cash in excess of the rate
24 allowances provided by the Commission. A

1 prepaid pension balance can also occur when a
2 negative pension expense is accrued on a
3 company's books. Con Edison's prepaid pension
4 balance developed as the result of this latter
5 situation rather than the Company actually
6 making cash contributions to the pension fund in
7 excess of its rate allowances. Thus, Con
8 Edison's prepaid pension expense balance is not
9 a cash prepaid expense, but rather the balance
10 sheet effect that results from the accrual of
11 negative pension expense.

12 Q. Were negative pension expenses reflected in Con
13 Edison's electric rates?

14 A. Partially. Con Edison electric rates reflected
15 negative pension expense accruals. However, the
16 Company booked negative pension expense accruals
17 well in excess of the levels that were reflected
18 in electric rates.

19 Q. Were differences between rate allowances and
20 actual pension accruals reconciled and deferred
21 for the benefit of ratepayers?

22 A. No. Effective April 1, 1997, Con Edison went
23 off the Pension Policy Statement and suspended
24 the reconciliation of rate allowances to actual

1 pension and OPEB accruals. As noted previously,
2 the Company returned to this Policy Statement
3 requirement effective April 1, 2005 for its
4 electric operations.

5 Q. How did Con Edison's actual pension accruals
6 compare to its rate allowances while the Company
7 was off the Pension Policy Statement?

8 A. Based on information provided by the Company in
9 its response to Staff IR DPS-478, we determined
10 that Con Edison's actual electric pension
11 expenses were negative \$885.6 million for the
12 period it was off the Policy Statement. During
13 this period, rate allowances for electric
14 pensions totaled negative \$609.0 million.
15 Therefore, the Company's actual pension expenses
16 were \$276.6 million lower than the level set in
17 rates. Since the Company was off the Policy
18 Statement at that time, the benefits of these
19 savings flowed to shareholders, not customers.

20 Q. Why is the inclusion of the prepaid pension
21 expense balance in rate base problematic?

22 A. The inclusion of the prepaid pension expense
23 will provide the Company a cash return on the
24 prepaid pension expense balance. A significant

1 portion of the Company's prepaid pension expense
2 is not associated with any cash outlay. As
3 such, the request to include the non-cash
4 component in rate base has no merit. Moreover,
5 the non-cash component of the prepaid pension
6 expense is not associated with any benefits
7 realized by customers. Customers received a
8 benefit only to the extent that pension credits
9 were reflected in the rates they paid. Con
10 Edison retained pension credits in excess of
11 those reflected in rates since it was not on the
12 Pension Policy Statement and now is attempting
13 to earn a return on the resultant profits it
14 earned while off the Pension Policy Statement.
15 To require customers to pay carrying costs on
16 the portion of a benefit they never received
17 (because it flowed to shareholders) is
18 inequitable and inappropriate.

19 Q. The Company's Accounting Panel, starting on page
20 71, suggests that negative pension costs
21 resulted in a cash financing requirement for the
22 Company. Do you agree?

23 A. No, not completely. While the Company's
24 Accounting Panel properly states that negative

1 pension expenses or credits were non-cash, they
2 also suggest that these non-cash credits were
3 used to reduce the Company's operating costs.
4 As a result, the revenue requirement was reduced
5 and cash flow was reduced. The Company's
6 argument misses the point, however, because it
7 fails to focus on the fact that the prepaid
8 balances were also derived from differences
9 between the negative pension credits reflected
10 in rates and the even greater negative pension
11 expenses actually booked by the Company. While
12 the Company is correct that cash flow was
13 reduced by the credits reflected in rates, its
14 position does not consider the fact that cash
15 flow was in no way affected by the prepaid
16 balances generated by the even greater negative
17 pension expenses booked by the Company. Put
18 another way, the Company's position is true only
19 to the extent the pension credits were reflected
20 in rates. Credits in excess of those reflected
21 in rates resulted in non-cash earnings on which
22 the Company now inappropriately seeks to earn a
23 return.

24 Q. How do you propose to remedy this situation?

1 A. We propose that the Commission consider the
2 portion of the prepaid pension balance that is
3 equivalent to the pension credits that were not
4 reflected in rates as a non-regulated asset. We
5 propose to adjust the Company's capitalization
6 to eliminate the capital supporting this non-
7 regulated asset. We reflected our adjustment in
8 the EBC adjustment to the Company's rate base.
9 This adjustment is necessary to ensure that the
10 Company only has an opportunity to earn a return
11 on its cash investments.

12 Q. What is the amount of your proposed adjustment?

13 A. Our proposed adjustment to the Company's EBC is
14 \$147.1 million.

15 Q. How did you calculate your adjustment?

16 A. We calculated that, for the period April 1997
17 through March 2005, Con Edison's actual electric
18 pension expense was \$276.6 million less than the
19 amounts provided for in rates. This over-
20 collection increased the Company's electric
21 earned return. For two rate years during the
22 period the Company was off the Pension Policy
23 Statement, the Company shared excess earnings
24 with customers pursuant to the terms of its rate

1 plans. After considering the benefits customers
2 potentially realized via shared earnings, we
3 calculated that Con Edison retained \$248.1
4 million of difference between its actual
5 electric pension expense and the level that was
6 reflected in rates. We recommend that the net-
7 of-tax amount of this difference, \$147.1
8 million, be reflected as an adjustment to the
9 Company's capitalization supporting electric
10 operations.

11 **BIR Discount - Recovery**

12 Q. What is the nature of the Business Incentive
13 Rate (BIR) Discount balance reflected in the
14 Company's rate base?

15 A. This item reflects discounts provided to
16 customers taking service under the Company's
17 Business Incentive Rate (Rider J). According to
18 the Company's response to Staff IR DPS-304, the
19 Company, between November 2003 and August 2005,
20 deferred for future recovery lost revenues
21 resulting from BIR discounts. This line item in
22 rate base reflects the unamortized net-of-tax
23 balance of the deferred lost revenues.

24 Q. Is the Company seeking recovery of the lost

1 revenues in this case?

2 A. No, the Company did not propose amortization of
3 the deferred balance. Rather, the Company
4 included the entire net-of-tax balance in rate
5 base.

6 Q. Is the Company's approach inappropriate?

7 A. The Company referred to the proposal in Cases
8 00-M-0095, 96-E-0897, 99-E-1020 (dated October
9 2, 2000, pages 27-28, approved by the Commission
10 on November 30, 2000) (Proposal) as evidence of
11 Commission authorization of the establishment of
12 a regulatory asset to account for the lost
13 revenues associated with BIR discounts.
14 However, the Proposal also included this
15 language on page 27, "Prior to such recovery,
16 the Company will file with the Commission's
17 Staff, and provide copies to economic
18 development administrators of BIR programs
19 (EDAs), the basis for classifying BIR additions
20 as 'retention' load for purpose of determining
21 such revenue shortfalls." The distinction
22 between new business and retention discounts is
23 of critical importance to determine the level of
24 lost revenues pursuant to the rate plan. Staff

1 is not clear whether the Company ever made such
2 a filing as required by the Proposal and
3 Commission Rate Order. In Staff IR DPS-304, we
4 requested that the Company provide copies of any
5 petitions it filed with the Commission seeking
6 authority of the establishment of a regulatory
7 asset to count for the lost revenues related to
8 BIR discounts. The Company did not provide any.
9 With the issues of classification and
10 measurement of lost revenues related to BIR
11 discounts unresolved, we propose to remove the
12 \$3.339 million line item from the rate base.

13 **Excess Deferred State Income Taxes (SIT)**

14 Q. What is your concern regarding excess deferred
15 SIT?

16 A. The New York State corporate income tax rate was
17 reduced from 7.5% to 7.1% effective January 1,
18 2007. The Company's rate filing reflected the
19 new tax rate in its computation of state income
20 taxes, Exhibit___(AP-9). However, the Company
21 did not address the impact of the tax rate
22 change on accumulated deferred SIT. Due to the
23 lower current income tax rate, prior deferred
24 tax balances are now overstated. Taxes will be

1 paid in the future at the new lower rate.
2 Therefore, the Company books reflect excess
3 deferred income taxes. The excess was funded in
4 rates. The Company's response to Staff IR DPS-
5 505 indicates that excess deferred SIT for
6 electric operation was \$12,562,707. We propose
7 the excess deferred state income taxes be passed
8 back to customers as a rate moderator. This
9 adjustment is reflected as an increase to Other
10 Operating Revenue of \$20.7 million and a
11 reduction to the deferred tax balance in rate
12 base in the amount of \$6.3 million.

13 **Long Island City Outage Costs**

14 Q. Has Con Edison included costs associated with
15 the July 2006 Long Island City (LIC) Power
16 Outage in the rate case request?

17 A. Yes. The Company has included the capital
18 restoration costs, damaged equipment retirement
19 costs, capital reinforcement costs and other
20 planned capital work in its rate base request.
21 As such, the Company is seeking a cash return on
22 the investments as well as related depreciation
23 expense from ratepayers.

24 Q. Do you have any concerns with the request?

1 A. Yes. The Company's actions before, during and
2 after the July 2006 equipment failures and power
3 outages in the LIC Network are under review in a
4 prudence proceeding (Case 06-E-0894). On advice
5 of counsel, the Commission has the authority to
6 determine whether a utility's costs of service
7 should be borne by the utilities' ratepayers or
8 its shareholders, with shareholders being held
9 responsible for those costs that a utility
10 "imprudently" incurred. Given that the
11 Commission has commenced a proceeding to review
12 the prudence of the Company's conduct, it is
13 premature for the Company to request recovery of
14 and a return on these investments at this time.

15 Q. What do you recommend?

16 A. We recommend that all costs related to the 2006
17 Long Island City outage be excluded from Con
18 Edison's revenue requirement pending resolution
19 of the prudence proceeding. If the proceeding
20 is completed prior to the Commission's
21 consideration of the rate case, then we
22 recommend an update to reflect the outcome of
23 the prudence case. If that proceeding is not
24 completed, we recommend that the Company be

1 authorized to deferred carrying charges on the
2 net plant balance at the cost of capital rate
3 approved in this case. In addition, the Company
4 should be authorized to defer related
5 depreciation accruals on the plant additions.

6 Q. Have you identified the outage related costs
7 included in the Company's rate request?

8 A. The Company has included \$49.6 million of LIC
9 related investments its rate year plant in-
10 service balance and \$4.77 of retirement costs in
11 its depreciation reserve in its rate base
12 request (see response to Staff IR DPS-479). In
13 addition the Company is seeking a depreciation
14 allowance of \$1.05 million for LIC related
15 investments. We recommend that all these cost
16 be eliminated from the Company's revenue
17 requirement at this time.

18 Q. Do you have any other concerns regarding outage
19 related capital costs?

20 A. Yes, we do. The Company has and continues to
21 accrue carrying costs on LIC outage related
22 investments and retirement costs.

23 Q. Please explain.

24 A. Pursuant to the terms of the Company's current

1 electric rate plan, the Company is authorized to
2 defer the revenue requirement impact of any
3 variation in the actual T&D net plant balance
4 from the level provided in rates. Specifically,
5 the Company is authorized to defer carrying
6 charges at an annual rate of 13.95%,
7 representing the combination of the Company's
8 allowed pretax rate of return and composite
9 depreciation rate. The outage occurred and the
10 majority of the capital retirement and
11 replacement costs were incurred during the
12 second rate year (12 months ended March 2007) of
13 the current electric rate plan. As a result of
14 significant capital expenditures in excess of
15 the levels provided for in rates in first rate
16 year and continuing through the second rate
17 year, Con Edison deferred significant carrying
18 charges on incremental T&D investments. The
19 outage related investments and retirement costs
20 were captured in this reconciliation process.

21 Q. Why is the T&D capital reconciliation relevant
22 to this rate case?

23 A. The Company is seeking recovery of deferred and
24 projected transmission and distribution

1 infrastructure carrying charges in two forms in
2 this case. Pursuant to the current rate plan,
3 reconciled items, charges or credits, are to be
4 deferred and recovered or passed back to
5 customers after the expiration of the plan in a
6 manner determine by the Commission. The rate
7 plan also provides that at the end of each rate
8 year, subject to audit and prudence review, the
9 Company may apply any available credits to
10 offset deferred charges. At the end of each of
11 the first two rate years, Con Edison provided
12 written notification to the Director of the
13 Office of Accounting and Finance regarding the
14 offset of deferred debits and credits. These
15 letters reflected the offset of deferred
16 carrying charges on incremental net transmission
17 and distribution net plant with then available
18 credits. Therefore, absent an adjustment here,
19 Con Edison will have already recovered the
20 carrying charges it accrued on the LIC Outage
21 related capital costs in rate year two. Since a
22 determination regarding the prudence of the
23 underlying costs has yet to be made, we believe
24 that it is not appropriate for the Company to

1 recover carrying charges thereon at this time.
2 In addition, the Company is seeking recovery,
3 over three years, projected carrying charges on
4 incremental T&D investment, including outage
5 related costs for rate year three of the current
6 rate plan.

7 Q. What does the Panel recommend?

8 A. As to the carrying charges accrued during rate
9 year two, we recommend that the Company be
10 required to reverse the application of credits
11 equivalent to the level of carrying charges
12 applied to outage related costs pending the
13 Commission's prudence determination. If the
14 costs are determined to be prudently incurred,
15 then the application of the credits can be
16 restored. If the costs are determined to be
17 imprudent, then the credits will be available
18 for future disposition as determined by the
19 Commission. As to the carrying charges accrued
20 during rate year three, we recommend that they
21 be separately deferred pending the Commission's
22 decision on prudence. Therefore, we have
23 eliminated the amortizations of the deferred
24 carrying costs from the revenue requirement and

1 the unamortized balance from the Company's rate
2 base.

3 **Other Rate Base Items**

4 **Accumulated Deferred Taxes -**

5 **Change of Accounting Section 263A**

6 Q. Do you have any concerns that may impact the
7 deferred federal income taxes reflected in the
8 Company's rate base in this case?

9 A. Yes. The Company's rate base includes average
10 accumulated deferred taxes for the rate year of
11 \$298 million associated with tax accounting
12 changes made under Section 263A of the Internal
13 Revenue Code. Starting in 2002, Con Edison
14 began to use the "simplified service cost
15 method". This permitted the Company to obtain
16 expense deductions for costs and assets that
17 would have otherwise been depreciated over a 15
18 to 20 year period. As noted in the Company's
19 Annual Report filed with the Commission "In
20 August 2005, the Internal Revenue Service (IRS)
21 issued Revenue Ruling 2005-53 with respect to
22 when federal income tax deductions can be taken
23 for certain construction-related costs. The
24 Company used the 'simplified service cost

1 method' (SSCM) to determine the extent to which
2 these costs could be deducted in 2002, 2003,
3 2004 and 2005, and as a result reduced its
4 current tax expense by \$318 million. The
5 Company expects that it will be required to
6 repay, with interest, a portion of its past SSCM
7 tax benefits and to capitalize and depreciate
8 over a period of years costs it previously
9 deducted under SSCM." The electric rate filing
10 reflects the deduction claimed for tax years
11 2002-2005, but not 2006. The rate filing simply
12 reflects an amortization of historic deductions.
13 The rate case assumptions are consistent with
14 actual book balance through February 2007 after
15 which the actual balances are significantly
16 lower. It is our understanding that the Company
17 has been working with the IRS to resolve the
18 disputed deductions as well as the future
19 applicability of the Section 263A for Con
20 Edison. In July, the Company was optimistic
21 that it would have an agreement with the IRS on
22 these issues by August. The 2006 income tax
23 return will be filed in September. At this
24 point, Staff is not sure whether the Company

1 will claim a Section 263A deduction or not. We
2 are concerned that the Company's estimate may
3 not reflect the level of actual deferred tax
4 balances for the rate year.

5 Q. Does the Panel propose to adjust rate base?

6 A. No. Since the resolution of this matter is
7 still pending and there is a potential for a
8 significant disallowance we recommend that the
9 Company provide an update based on the latest
10 available information. The update should
11 reflect any related offset to the ADR/ACRS/MACRS
12 rate base balances. Should a resolution with
13 the IRS be reached during the course of this
14 proceeding, the Company should notify the
15 parties and, depending upon the current status
16 of the proceeding, an update should be required
17 of the Company.

18 **Federal Income Taxes (FIT)**

19 **FIT for Electric Production**

20 Q. Does the Panel have any issues with the FIT for
21 electric production?

22 A. Yes. Neither the Company's original filing nor
23 its preliminary update reflects the IRS Code
24 263A - Capitalized Overhead (263A) reduction in

1 the electric production revenue requirement
2 schedule. In response to Staff IR DPS-183, the
3 Company provided the current amortization of
4 263A deferred taxes applicable to electric
5 production plant, which is \$1.325 million. The
6 response indicated that this amount was included
7 in the FIT schedule for the overall revenue
8 requirement. Staff proposes to allocate \$1.325
9 million to the Company's production revenue
10 requirement computation.

11 Q. How will your proposed change impact the
12 Company's revenue requirement?

13 A. The relocation of 263A reduction to electric
14 production revenue requirement schedules does
15 not affect the overall revenue requirement,
16 because the amount was included as part of the
17 total 263A reduction in the Company's overall
18 revenue requirement. The relocation affects the
19 allocation of the revenue requirement between
20 delivery revenue requirement and the MAC revenue
21 requirement.

22 **First Avenue Proceeds**

23 Q. On pages 73 through 74 of the Company's
24 Accounting Panel testimony, the use of the

1 after-tax gain from the sale of Con Edison's
2 First Avenue Properties is discussed. On page
3 91, the interest related to these proceeds is
4 discussed. Do you agree with the Company's
5 proposals?

6 A. Con Edison is proposing to refund the Company's
7 estimate of the net gain and associated interest
8 from the sale of the First Avenue Properties to
9 customers over a three-year period. While we do
10 not object to this proposal, it should be noted
11 that the Commission has not yet acted on the
12 Company's proposed accounting and ratemaking for
13 the net proceeds of the First Avenue Properties
14 in Case 01-E-0377, and therefore, the exact
15 level of proceeds available to be returned to
16 electric customers has not yet been determined.
17 Pending the resolution of that proceeding, the
18 refund amount proposed by the Company for the
19 rate year can be used as a placeholder and
20 updated to reflect the Commission's decision in
21 that proceeding. In the event the Commission
22 does not rule on the level of gains until after
23 the Commission issues an order in this rate
24 proceeding, Staff recommends that the Company be

1 required to set aside such additional gains for
2 return to customers in a subsequent rate case.

3 **Deferred Accounting**

4 Q. On page 18 through 25 of his testimony, Company
5 witness Rasmussen seeks to employ the use of
6 deferred accounting to true-up a number of items
7 and to continue the annual netting of
8 outstanding deferrals. Does the Panel support
9 the Company's requests?

10 A. The Panel's recommendations on deferred
11 accounting for pension and OPEB expenses,
12 environmental remediation, interference
13 expenses, property taxes, and World Trade Center
14 costs have already been addressed in our
15 testimony. We object to the Company's request
16 to continue the annual netting of deferrals in a
17 one-year rate plan. The Commission should
18 determine the disposition of any deferred
19 balances in the Company's next rate case.

20 Q. Does this conclude your testimony at this time?

21 A. Yes.
