

NYSERDA - The Center for Energy Efficiency and Building Science (CEEBS)

The Center for Energy Efficiency and Building Science (CEEBS), headquartered at Hudson Valley Community College, develops and delivers *Workforce Development* building-science training in the System Benefits Charge utility territories across New York State.

The training, which is recognized by the **Building Performance Institute (BPI)**, provides building science instruction to building technicians, architects, engineers, and other building professionals. Current subject areas include:

- **Building Analyst**
- **Envelope Professional**
- **Heating Professional**
- **Cooling Professional**
- **Home Energy Rating System Rater**
- **Multifamily Building Analyst**
- **Home Performance Sales and Marketing**
- **Multifamily Building Operator***
- **Multifamily Hydronic Heating System Design***
- **Geothermal Heat Pump Installation***

*Class Under Development

Upon completing a training class, students may apply, and test for, BPI certification. Certified technicians and professionals are then eligible to participate in NYSERDA's residential energy conservation programs, such as **Home Performance with ENERGY STAR®**, and the **ENERGY \$MART Multifamily Performance Program**.

There are currently seven CEEBS Learning Center Locations:

- **Hudson Valley Community College, Troy, NY**
- **OCM BOCES, Syracuse, NY**
- **Broome Community College, Binghamton, NY**
- **Erie Community College, Buffalo, NY**
- **Bronx Community College, New York, NY**
- **Association for Energy Affordability (AEA), New York, NY**
- **Fulton-Montgomery Community College, Johnstown NY**

- **Westchester Community College (pending)**
- **Onondaga Community College (pending)**
- **SUNY Canton NY (pending)**
