Credit Related Complaints vs. Total (Energy Utilities)	5
Customer Service Response Index	6
Informal Hearings, Shared Meter Cases, Appeals and Rehearings	10
Summary of Customer Contacts recorded against ESCO's	11

If You Have a Complaint About Your Utility Service

The Office of Consumer Services (OCS) takes all utility consumer matters seriously, including complaints. When you contact our office with a complaint about a utility or other service provider, we take immediate steps through our Quick Response System (QRS) to address your concerns.

The QRS Process

We Contact Your Utility - In an effort to ensure that utilities fulfill their obligation to provide effective customer service, we first ask the utility to contact you and resolve your concerns.

Your Utility Contacts You - As directed by OCS, the utility will contact you to:

- Discuss your concerns
- Provide you with the name and telephone number of a utility representative to call if you need further assistance
- Give you a date by which the company will get back to you about your concerns

You Maintain Contact With Your Utility - All future correspondence will come directly from the utility. If you have questions regarding your case please call your utility representative.

The Follow-up

Contact us if:

- ◆ The utility does not contact you
- ◆ The utility does not provide its response to you within a reasonable timeframe
- ◆ The matter remains unresolved

If you have any questions regarding the process for addressing your concerns outlined above, please contact us at 1-800-342-3377.

Customer Service Response Index

Quick Reference Guide

In order to measure the effectiveness of each service provider's performance concerning issues brought to our attention by their customers the Office of Consumer Services has developed a Customer Service Response Index (CSRI). This index is reported on a monthly basis to compare the level of service and responsiveness delivered by each service provider under the Commission's jurisdiction. The CSRI is determined by measuring the following four metrics:

The Consumer Satisfaction Metric (CSM); a ratio of the number of complaints to the number of QRS cases in the reporting month. All customer contacts begin as QRS cases. A complaint is recorded as a result of the customer being dissatisfied with the service provider's resolution of a case which was handled as a QRS case. A CSM score of 5 points are awarded when a service provider receives no complaints during the reporting month. There is no score awarded if a service provider satisfies less than 50% of the customers that the PSC refers to them.

The QRS Response Time Metric (QRM); the average number of days it took the service provider to respond to QRS cases closed in the reporting month. A QRM score of 2 points is awarded when a provider's average response time for QRS cases is 14 days or less. The response time on each case is calculated by subtracting the response date from the date the case was opened. The average response time for each service provider is calculated by adding all the response times for QRS cases closed in the reporting month and dividing by the number of QRS cases closed that month. No points are earned if the average response time for QRS cases is more than 28 days (twice the acceptable reply standard).

The SRS Response Time Metric (SRM); the average number of days it took to respond to SRS cases closed in the reporting month. An SRM score of 2 points is awarded when a service provider's average response time for SRS cases is 10 days or less. The response time on each case is calculated by subtracting the SRS response date from the date the SRS case was opened. The SRM average response time for each provider is calculated by adding all the response times for SRS cases closed in the reporting month and dividing by the number of SRS cases closed that month. If the case was in rebuttal status (a request by staff for additional information subsequent to a service providers initial reply), the response time will be calculated by subtracting the response date from the date the case was rebutted by staff. No points are earned if the average response time for SRS cases is more than 25 days (two weeks past due).

The Pending Case Metric (PCM); the average age of all cases awaiting response, determined on the last day of the reporting month. A PCM score of 1 point is awarded when a service providers' average age of cases is 14 days or less. The age of each case is determined by subtracting the last day of the reporting month from the date opened on all cases awaiting a utility response. The PCM average is calculated by adding the age of all pending cases at the months end and dividing by the number of open cases. No points are earned if the average age of cases exceeds 70 days (two months delinquent) and a negative score is applied and if the average age is between 70 and 90 days.

The final CSRI score is the sum of the four metrics. Complete CSRI data is posted for those service providers that average 10 or more QRS cases per month. For all other service providers, the performance in each area is reported monthly less the actual CSRI measure. The volume of activity for these companies would result in significant fluctuations on a month to month basis. These fluctuations may result in the reader reaching an inaccurate conclusion as to a service providers performance.

Informal Hearings, Shared Meter Cases, Appeals and Rehearings December 2005

Informal Hearing Cases

At the end of December, there were 110 cases in the Informal Hearing Unit. During this month, 4 complaints were resolved with pre-hearing mediation, 8 informal hearings were scheduled, a hearing was postponed, one complainant failed to appear for his hearing and 6 hearings were held. Nine informal hearing cases were closed with written decisions and one complainant withdrew his complaint.

Shared Meter Designee Cases

Under Section 52 of the PSL (Shared Meter Law) only the Commission or its Designee can decide certain complaints. The majority of these cases concern the 12-month charge assessed to owners for failure to find and correct instances of shared metering. At the end of December there were 198 shared meter complaints pending (121 SMD & 77 SMU). Twenty-five (25) cases were closed¹. Further information on the closed cases follows.

The designee reduced the 12-month assessment to the minimum of 25% in 12 cases, between 26% to 50% in 4 cases and between 51% to 75% in 5 cases. In 1 case, the twelve-month assessment billed to the landlord was cancelled because staff found that the shared use was minimal. The twelve-month assessment billed to the landlord was also cancelled in another case because the company did not prove non-cooperation by the owner².

Appeals and Rehearings

At its December 16, 2005 session, the Commission approved OCS's recommended determinations of 3 appeals. One appeal determination concludes that prior to the existence of a Con Edison back-up steam rate, a nonresidential customer was not entitled to receive Con Edison interruptible gas service using the utility's steam service as its alternate energy source. Another appeal determination upholds a finding that Con Edison's gas tariff required a non-residential customer, under the circumstances of the case, to pay for enhancement of utility gas facilities necessary to supply an increased load as a condition of receiving interruptible service. The last appeal determination finds that NMPC was not required to provide refunds to a village and a school district of sales tax it collected from them for certain accounts until the accounts were identified by the customers as tax exempt.

In December, one appeal was accepted for review. It concerns billing of a residential customer by National Fuel. Two rehearing petitions were accepted for review. One, by a Con Edison gas customer, seeks rehearing of an appeal determination. The other petition, by a Con Edison electric customer, seeks rehearing of a decision by the Commission's designee in a shared meter dispute.

One case was a duplicate and one case was not SMD.

² The SML allows the utility to determine that a tenant's meter is shared if the landlord failed to cooperate with the utility's request to investigate.
