Jaclyn A. Brillling, Secretary
3 Empire State Plaza
Albany, New York, 12223-1350

Dear Ms. Brillling,

As an introduction, Universal Energy Corporation ("UEC"); a growing and progressive Retail Energy Marketer originating from Ontario. Briefly, we have been marketing gas/power in Ontario and most-recently to the Commercial sector in Michigan for over a year now and we are proud of our successes to date. We have just passed the 200,000 customer mark.

Being that UEC is currently completing its license application to Market in the New York Natural Gas and Electricity Markets, we wish to formally support U.S. Energy Savings' ("USES") Petition with respect to the creation of a Contest Period.

Specifically, we agree with the views of USES that a Contest Period should be implemented to allow the incumbent ESCO sufficient time to contact the customer to confirm intent. A Contest Period will also help eliminate confusion, contract disputes, and early termination fees resulting from and secondary ESCO "poaching" from an Incumbent ESCO.

Thank you for your attention and for consideration of our views in this matter.

Regards,

Nino Silvestri
Chief Operating Officer
