

Aaron Breidenbaugh -Manager of Regulatory Affairs and Public Policy - Northeast

Summary Responsibilities

As Manager of Regulatory Affairs and Public Policy for the Northeastern region, Aaron attends all relevant NYISO and ISO-NE committee meetings related to the participation of Demand Resources, including Demand Response Working Groups, Markets Committees, Management/Participants Committee, and operating/Reliability Committee. Aaron represents EnerNOC before the region's public utility commissions, as well as the Federal Energy Regulatory Commission.

Finally, Aaron is responsible for coordinating EnerNOC's interaction with state and federal legislative bodies throughout the Northeast.

Relevant Experience

Aaron's entire career has been involved in the process of electric industry restructuring, starting with the independent power industry, moving to the creation of the region's Independent System Operators, development of wholesale power markets, and, most recently, advocacy for the active participation of end-users in those markets through demand response programs at the ISO and utility levels.

Prior to joining EnerNOC, Aaron was the Program Coordinator for the New York Independent System Operator, in charge of the day-to-day operation of the NYISO's award-winning Demand Response programs. Prior to that, Aaron was the Executive Director of the Price Responsive Load Coalition, the only trade association representing demand response interests in the Northeast. In that position, Aaron was intimately involved in the development of the demand response programs in New York and New England. Previous to that, he was a strong advocate for electric industry restructuring at Automated Power Exchange, Inc. as they attempted to establish a private power pool/market in the Northeast. Finally, the first ten years of his career was spent at the Independent Power Producers of New York, Inc., the state's IPP trade association where he finished his term as the association's Deputy Director and Director of Regulatory Affairs.

Education

Aaron holds a Master's Degree in Science and Technology Studies, with a specialization in Energy Policy from Rensselaer Polytechnic Institute, as well as Bachelor's Degree in Nuclear Engineering, also from RPI.
